

I will make this e-mail short as I am sure you will be receiving many supporting the recommendations to reduce neighborhood noise coming from Centennial Airport. I have lived in my house close to 30 years and prior to the planes flying directly over my house, it was a perfect place to live. Now, I have to stop a phone conversation, miss part of what is said on the radio or TV, be awakened at night or during the day, not hear or be heard by a friend or family member or, at times, even cover my ears to protect my hearing when a plane flies over my house. I didn't bargain for this when I spent a lot of money to buy my house and I urge you to support all 12 of the recommendations to reduce the noise, and in particular the recommendations that would reduce the noise directly over my house which is just northwest of the airport. I gave up calling Centennial Airport a long time ago after seeing planes flying over my house. It never did any good, so it was a waste of time. Hopefully this won't be a waste of time as well. Thank you for considering all of us who have put up with this problem for years and want a solution.
