

I just heard about banning the loud jets at Centennial. I can remember when I moved to my neighborhood 20 yrs. ago, north of the airport, I would stand in my front yard and the silence was deafening. Now, it's the jets that are deafening. I support any action that would reduce the noise. It's a wonderful place to live in every other way except for the noise which has gotten worse over the yrs. Sometimes my walls shake when a jet flies over. Please help get it back under control.

Thank you,

Mike
