

Our family has lived near the intersection of Dry Creek Rd. and Quebec St. for 19 years. We have noticed an increase in airport noise over the past 5 years. We support the ban of Stage 1 aircraft, and the night time ban on Stage 2 aircraft, between the hours of 10PM and 7AM. We support the goal of reducing the impact of the airport on surrounding neighborhoods, including our own.

We believe that interstate and foreign commerce by louder aircraft can be achieved at Denver International airport, not our small community airport.

It is very difficult to enjoy outdoors activities with persistent, loud airport noise. It is difficult to sleep when aircraft noise is heard as early as 5 AM. We appreciate your attention to the needs of homeowners in the area. Please contact us if you have further questions.
