

While I am a pilot, I bought my home near Centennial Airport only after checking the flight patterns. On days when the airport is extra busy, I cannot enjoy a quiet afternoon on my deck. Permanently re-routing aircraft will not only lower my home value, my quality of life, but also put stress on the wildlife I enjoy viewing in Cherry Creek State Park.

If I had purchased my home beneath the current traffic patterns, I would not be able to complain about the noise. When the move to DIA was made and the traffic pattern caused noise in Parker, changes were made to mitigate it.

Thank you for your consideration.

Sincerely,

Stan Reubenstein
