

I am sending you an e-mail regarding the aircraft noise levels in the Heritage Hills Subdivision in Lone Tree, Colorado. It is important to me and my family that the twelve noise abatement recommendations be adopted at Centennial Airport. Aircraft noise levels have substantially increased over the time that we have lived in Heritage Hills. It is my understanding that with adoption of these recommendations, noise levels can be significantly reduced with very little impact on the individuals and companies flying overhead. Thank you for your time and consideration. Please feel free to contact me with any questions.
