

We support the following recommendations that would abate Centennial Airport aircraft noise in general:

- banning ALL Stage 1 aircraft
- banning Stage 2 aircraft from between the hours of 10PM and 7AM

However, we STRONGLY OPPOSE any changes to the existing flight patterns.

- It would be grossly inequitable to penalize homeowners who purposely purchased properties outside of the flight plan to benefit homeowners who knowingly purchased properties inside of the flight pattern.

- The proposed changes will likely precipitate numerous lawsuits because it will depreciate property values of homeowners in the previously unaffected areas to benefit homeowners who willingly accepted being located in the path and that there would be noise when they acquired their property. Keep in mind that the existing housing crisis will further exacerbate the OUTRAGE of those adversely affected by the proposed flight plan changes.

We appreciate your time and consideration of the concerns we have expressed above.
