

This letter is in reference to the recommendations of the noise problem at Centennial Airport.

My home would be in the proposed departure corridor recommended by the FAA over Aurora. I am firmly opposed to the route proposed change in departures by the FAA both during the nighttime hours and the daylight hours. We currently have to contend with departure flights from Buckley Air National Guard field from much noisier aircraft than which currently use Centennial Airport.

When we purchased our home we were aware of the flight pattern from Buckley and accepted this noise disturbance. The people now complaining about Centennial Airport should have been aware of the same problem when they purchase/built their homes in those corridors.

William Jacoby
