

Facilities Management Goals & Policy

Goals:

The Department of Energy 2006 Strategic Plan – Goal 5.3 – Infrastructure: “Build, modernize, and maintain facilities and infrastructure to achieve mission goals and ensure a safe and secure workplace.”

The Office of Science 2004 Strategic Plan - Goal 7.4 – Establish a modern laboratory system, fully capable of delivering the science our Nation requires.

It is SC's policy that:

- capital asset management demonstrate good stewardship to ensure facility preservation and safe, secure, environmentally sound, cost effective operations and missions readiness;
- capital assets be modernized to ensure they are “mission ready” (i.e., ready to support existing and future scientific missions);
- capital assets be maintained in accordance with policies and practices that reflect DOE (good business or recognized industry) standards and national priorities;
- SLI program priorities be objectively determined on the basis of sound engineering and management judgment;
