ECHO

PURPOSE
Specifies that all future commands will be "echoed" back to the terminal at the time of execution.

DESCRIPTION
This command is most commonly used for the following purposes:

1. to help debug DATAPLOT macro files;

2. to document alphanumeric output from DATAPLOT sessions when the output is diverted to a file with the CAPTURE command.

The echoed command line is enclosed within a box of asterisks for easier identification.

SYNTAX
ECHO <ON or OFF>
where ON specifies that subsequent commands are echoed while OFF specifies that they are not echoed.

EXAMPLES
ECHO ON
ECHO OFF
ECHO

DEFAULT
The default is no echo.

SYNONYMS
None

NOTE
The ECHO command with no arguments is equivalent to ECHO ON.

RELATED COMMANDS
