Graphics Commands S CHART

S CHART

PURPOSE

Generates a standard deviation control chart.

DESCRIPTION

A standard deviation control chart is a data analysis technique for determining if a measurement process has gone out of statistical control. The S chart is sensitive to changes in variation in the measurement process. It consists of:

```
Vertical axis = the standard deviation for each sub-group.
```

Horizontal axis = sub-group designation.

In addition, horizontal lines are drawn at the mean standard deviation value and at the upper and lower control limits.

SYNTAX

EXAMPLES

S CHART Y X

NOTE 1

The distribution of the response variable is assumed to be normal. This assumption is the basis for calculating the upper and lower control limits.

NOTE 2

The attributes of the 4 traces can be controlled by the standard LINES, CHARACTERS, BARS, and SPIKES commands. Trace 1 is the response variable, trace 2 is the mean line, and traces 3 and 4 are the control limits. Some analysts prefer to draw the response variable as a spike or character rather than a connected line.

NOTE 3

Versions prior to December 1993 have a bug in that the S CHART command conflicts with the SAVE command. Use the SD CHART or the SD CONTROL CHART syntax (see SYNONYMS section below) for these versions.

DEFAULT

None

SYNONYMS

```
SD CHART for S CHART.
```

S CONTROL CHART for S CHART.

SD CONTROL CHART for S CHART.

RELATED COMMANDS

R CHART	=	Generates a range control chart.
X CHART	=	Generates a mean control chart.
P CHART	=	Generates a p control chart.
NP CHART	=	Generates a Np control chart.
U CHART	=	Generates a U control chart.
C CHART	=	Generates a C control chart.
CHARACTERS	=	Sets the types for plot characters.
LINES	=	Sets the types for plot lines.
CRITTEC		~

SPIKES = Sets the on/off switches for plot spikes.

BARS = Sets the on/off switches for plot bars.

PLOT = Generates a data or function plot.

LAG PLOT = Generates a lag plot.

4-PLOT = Generates 4-plot univariate analysis.

STANDARD DEVIATION PLOT = Generates a standard deviation (vs subset) plot.
