OCTOBER 18... AUSTRALIA'S GREAT BARRIER REEF is the world's largest structure made by living organisms and is so vast it can be seen from outer space. Come "dive down under" and explore one of nature's wonderlands. Discovered by English explorer James Cook in 1770 when his ship ran aground, the area is today a popular tourist destination and home to thousands of sea creatures including whales, dolphins, turtles, sharks, frogs and some 215 species of birds. The park is working to conserve its many marine ecosystems.

NOVEMBER 15... PETRA IN THE KINGDOM OF JORDAN... an archeological adventure! According to legend Petra is the spot where Moses struck a rock with his staff and water came forth. Petra was unknown to the Western world until 1812 when it was discovered by a Swiss explorer. "Petra" means "rock" in Greek and is literally a city of some 800 structures carved into the rose-red cliffs. It is breathtakingly beautiful and was featured in the movie "Indiana Jones and the Last Crusade."

JANUARY 10... TAJ MAHAL IN INDIA... was built in memory of Emperor Shah Jahan's wife. It was completed in 1648 after 22 years of construction and at a cost of 32 million rupees which translates into trillions of dollars today. More than 1,000 elephants were used to transport building materials from all over India and Asia. Its stunning architectural beauty is "beyond description" and features flower beds, a reflecting pool, trees and fountains as well as the famous onion dome and minarets. It is a masterpiece, an "eternal love story."

APRIL 25... THE PANAMA CANAL... is one of the largest and most difficult engineering projects ever undertaken. Come with us to "The Land of the Butterflies, Boats and the Bridge of the Americas" as we explore this manmade wonder! The idea of a canal to join the Atlantic and Pacific Oceans dates back to the 16th century fueled by desires to transport the riches of Peru, Ecuador and Asia back to Europe. The United States completed the project in 1914 and it is still today a main route for international trade. Tourists are fascinated by the trip through three sets of "locks" which require only gravity to adjust the water levels as ships pass through... from one side of the world to the other.

Light rail safety

METRO is testing light rail vehicles in Tempe. Each vehicle in the METRO fleet must be checked to ensure it meets safety and performance specifications. The rail, signals, power system and all other components are also tested to ensure quality performance. Light rail is an extremely quiet mode of transport, so residents are encouraged to:

- Listen for bells and look for flashing train headlights.
- Use the crosswalk and obey all signals.
- Don't stop your car or bike on the tracks.
- Obey the traffic signals; turn left across tracks only with a green arrow
- No biking, walking or skateboarding in the trackway.

METRO will begin operation December 29 with a grand opening celebration on December 27 and 28. For more information, visit www.metrohightail.org/safety.
