## **2005 Compendium of State's Mercury Activities**

## **Environmental Council of the States and National Wildlife Federation**

### Michael Murray, Ph.D. National Wildlife Federation

Canada – U.S. Binational Toxics Strategy Mercury Workgroup Meeting December 6, 2005 Chicago, IL

## **Quicksilver** Caucus

- Survey conducted by Quicksilver Caucus coalition of state associations working on mercury:
  - Environmental Council of the States
  - Association of State and Territorial Solid Waste Management Officials
  - State And Territorial Air Pollution Program Administrators
  - Association of Local Air Pollution Control Officials
  - Association of State and Interstate Water Pollution Control Administrators
  - Association of State Drinking Water Administrators
  - National Pollution Prevention Roundtable

# **Survey Approach**

- Updates and expands upon ECOS compendium of state activities in 2001
- Survey developed and distributed by members of Quicksilver Caucus to state governments, from December 2004 – April 2005
- NWF assisted in compiling information and preparation of report
- Funded by U. S. EPA, with additional support from Garfield Foundation

## **General Results**

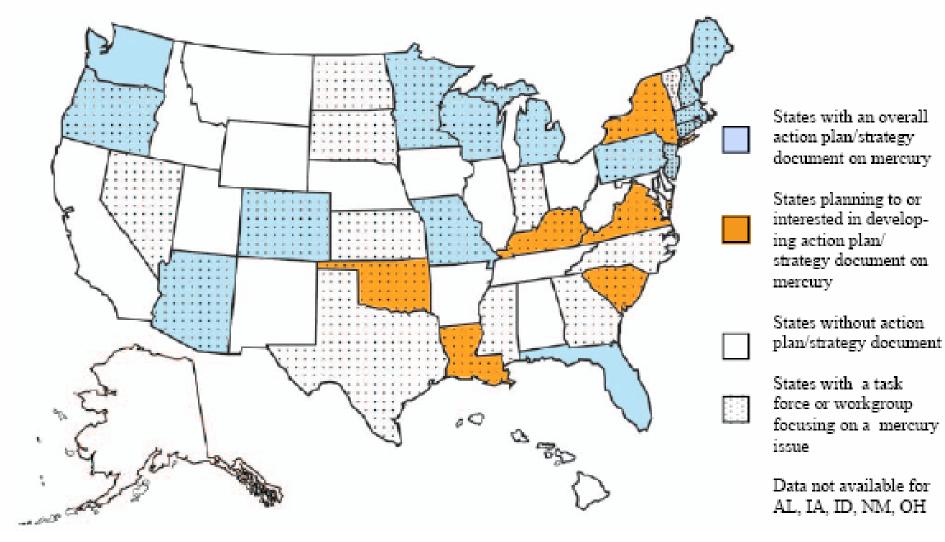

- 45 states responded to survey
- Over one-third of states responding reported having mercury action plan or strategy document, with additional six states in planning stage
- More than 40 % of states responding reported steps to curb mercury use in products and to prevent improper disposal
- Most states reported having some type of mercury inventory, nearly all states conduct monitoring, and every state reported ongoing public outreach

#### P: Planned

V: Voluntary; \*: plan to convert to mandatory removal program

M: Mandatory

## **Outreach/Public Education**

- All states responding reported some type of public outreach/education
- Two states (DE, WA) have state laws requiring outreach/education
- 39 states target outreach to specific constituencies, including:
  - Sport anglers (32 states)
  - Pregnant women (32) or women of childbearing age (27 states)
  - Subsistence fishers (16 states)
- Most common type of outreach is on safe fish consumption

## **State Perspectives on Needs and Challenges**

- States expressed need for access to long-term elemental mercury storage, in particular through a federal program
- Knowledge gaps included approaches to clean up legacy mercury/contaminated sediments, and effective mercury control technology for industrial sources
- Agencies would benefit by having greater legislative mandate on mercury reductions
- Lack of financial resources commonly cited problem (often sporadic, with few states reporting long-term funding for monitoring, research, or education)
