

Installed and simple straight-line extrapolation of installed wind capacity in aMW (200 MW per year, with a typical capacity factor of 0.3). The two dots indicate the REAP goals in aMW for 2015 and 2025.

	A	B	C	D	E	F
1	Oregon's Renewable Energy Action Plan's (REAP) goals and					
2	wind energy capacity growth (simple extrapolation) (1)					
3						
4			(in aMW)	(in MWh)		
5	Total sales to ultimate customers in 2004		5,118	44,833,617		
6	Annual growth rate <i>after</i> conservation (%)		1			
7						
8	Oregon's Renewable Energy Action Plan's (REAP) Goals: IOUs AND COUs					
9	End of		year 2015		year 2025	
10			(in aMW)	(in MWh)	(in aMW)	(in MWh)
11	Total sales (aMW)		5710	50,019,447	6307	55,252,588
12	Total sales growth since end of 2004 (aMW)		592	5,185,830	1189	10,418,971
13						
14	Renewable Action Plan's Goal: 10% renewables by 2015		571	5,001,945		
15	Renewable Action Plan's Goal: 25% renewables by 2025				1577	13,813,147
16						
17	Actual and simple straight-line extrapolation in large wind capacity					
18	and compare to REAP goals assuming all wind with 0.3 capacity factor					
19						
20						
21	Total installed and simple straight line extrapolation of wind energy capacity by 200 MW/year after 2007					
22			Wind	Wind	REAP	
23		Year	Capacity (MW)	Capacity (aMW)	Goal (aMW)	
24		2005	337	101		
25		2007	800	240		
26		2009	1200	360		
27		2011	1600	480		
28		2013	2000	600		
29		2015	2400	720	571	
30		2017	2800	840		
31		2019	3200	960		
32		2021	3600	1080		
33		2023	4000	1200		
34		2025	4400	1320	1577	
35						
36	(1) No judgement is made as to utilities' operational aspects of high wind energy capacity in later years					
37
