

Legend for 2007 TEP Species List										
REGIONS - Forest Service Regions, and time of last comprehensive update										
R1 -Northern Region, Regional Office (RO) in Missoula MT										
R2 -Rocky Mountain Region, RO in Denver CO										
R3 - Southwestern Region, RO in Albuquerque NM										
R4 - Intermountain Region, RO in Ogden UT										
R5 - Pacific Southwest Region, RO in Vallejo CA										
R6 - Northwest Region, RO in Portland OR										
R8 - Southern Region, RO in Atlanta GA										
R9 - Eastern Region, RO in Milwaukee WI										
R10 - Alaska Region, RO in Juneau AK										
DPS	Distinct Population Segment									
Common Name	Common name used by FWS/NMFS									
Federal Status	T - threatened, E - Endangered, PT - Proposed threatened, PE - Proposed endangerec (three Pacific salmon/steelhead T or E species also have been proposed for a different T or E status)									
NatureServe Global Sci. Name	Scientific name used by NatureServe & State Natural Heritage Programs; http://www.natureserve.org/explorer									
Year Final Recovery Plan	Year of the latest, final, approved recovery plan Species without a final recovery plan may have a DRAFT recovery plan N/A - exempt from recovery plan development.									
Major Group	Plant, Invertebrate, Vertebrate									
Subgroup	Bryophyte, Conifer, Fern/Fern Ally, Fungi, Lichen, Arachnid, Crustacean, Insect, Mollusc, Other Invertebrate Amphibian, Bird, Fish, Mammal, or Reptile									
Nature Serve (NS) Global Rank	NatureServe global conservation status rank of taxon; http://www.natureserve.org/explorer/methods.htm G1 = critically imperiled, at very high risk of extinction due to extreme rarity, very steep declines, or other factors G2 = imperiled, at high risk of extinction due to very restricted range, very few populations, recent and widespread declines or other factors G3 = vulnerable, at moderate risk of extinction due to restricted range, relatively few populations, recent and widespread declines, or other factors G4 = apparently secure, uncommon bu not rare; some cause for long-term concern due to declines or other factors G5 = secure, widespread and abundant G#G# = a numeric range rank, used to indicate the range of uncertainty in the status of a species or community GH = possibly extinct, missing; known from only historical occurrences but still some hope of rediscovery GU = unrankable, due to lack of information or due to substantially conflicting information about status or trends GNR = unranked; Global rank not yet assessed GNA = not applicable; a conservation status rank is not applicable because the species is not a suitable target for conservation activities									

Modifiers:			
G#Q = questionable taxonomy, taxonomic distinctiveness at the current level is questionable			
G#? = denotes inexact numeric range			
GX = Presumed extinct			
NS Rounded Global Rank		For taxa whose rank spans more than one rank, the single most at-risk rank	
NatureServe U.S. N Rank		NatureServe conservation status rank of taxon at only U.S. national scale; same ranks as used for global rank, but applied at national scale (N)	
NS Rounded U.S. N Rank		For taxa whose rank spans more than one rank, the single most at-risk rank	
NS P. Rico Rank		NatureServe conservation status rank of taxon at only the Puerto Rico scale; same rank number as used for global rank, but applied at the Puerto Rico scale	
NS Rounded P. Rico Rank		For taxa whose rank spans more than one rank, the single most at-risk rank
