Subject: Support Outsourcing and Privatization

Dear Sir or Madam,

I support the administration's proposal to open up federal commercial work functions to outsourcing and privatization. This will provide private workers and businesses new opportunities for employment and expansion while introducing competition into the federal workplace. Make an effort to remove any roadblocks to the implementation of this proposal including what is sure to be an effort to define truly commercial activities as un-commercial. I look forward to the day when the government's economic activities are held to the same competitive scrutiny as those of private concerns.

Sincerely,

Mark D. Crowley
