

Brighten Our Communities

WITH ENERGY EFFICIENT COMPACT FLUORESCENT LIGHT BULBS

Save money! Save energy! Buy Compact Fluorescent Light (CFL) bulbs from any of the community groups participating in DMEA's light bulb fund-raising program (participating groups are listed at www.dmea.com).

Replace your 5 most used standard (incandescent) light bulbs. You should save about \$5 per year in energy costs per bulb at today's DMEA rates.

Since CFLs should last over 10 times longer than regular light bulbs, purchasing five CFL bulbs could save you up to \$250 in replacement costs and electricity!

YOU SAVE MONEY! COMMUNITY GROUPS EARN A \$2 DONATION FOR EACH BULB YOU BUY!

Your donation to community groups through this program is really a breath of fresh air!

According to **ENERGY STAR**[®] (www.energystar.gov), each CFL bulb eliminates 500 pounds of air pollution.

Join us in brightening our communities with energy efficient lights.
