SUMMARY TRAVEL CHARACTERISTICS

Bureau of Transportation Statistics
U.S. Department of Transportation

WHAT IT'S ALL ABOUT

The American Travel Survey collected information from approximately 80,000 households about their long-distance travel in 1995. The ATS provides answers to how, why, where, when, and who travels in America. The ATS is the first comprehensive effort since 1977 to determine where and how people travel in the United States. The data provide insight into Americans' long-distance transportation choices, and are useful for transportation planners and decision makers, the transportation industry, the travel and tourism industry, and others interested in learning about domestic and foreign travel.

The *Summary Travel Characteristics* publication series contains summary tables of travel statistics for census regions and divisions, States, and metropolitan areas. The tables in this report provide an overview of the findings of the American Travel Survey for each State. Information includes the origin, destination, volume, and characteristics of long-distance travel. Tables 1 through 5 include information for household trips and tables 6 through 15 provide information for person trips. Table 16 provides information about household trips, person trips, person miles of travel, and vehicle miles of travel.

The printed versions of these Internet-based summary tables can be accessed electronically at <http://www.bts.gov/programs/ats>. The tables are presented in Adobe PDF (Portable Document Format) file format which can be viewed or printed using the Adobe® Acrobat® Reader software. The Internet site also contains a spreadsheet file in Microsoft® Excel (XLS) format for those users who would like to use the tables in spreadsheet format.

Information about the American Travel Survey data collection and processing procedures and/or sampling error is available on the website. Definitions of travel and transportation characteristics are also available on the website. This information can be accessed from the ATS home page by selecting "Documentation."

Subsequent reports, tabulations, and electronic files will present more detailed information on travel for the United States, census regions and divisions, States, and metropolitan areas.

 [Trips of 100 miles or more, one way. Data based on a sample and subject to sampling variability; see documentation. For definitions of terms, see documentation. Symbol -- means "rounds to or represents zero." NA means "Not Applicable." Numbers are in thousands. The most frequent State origins are those States with the 10 largest volumes of travel to Rhode Island which have coefficients of variation less than 10 percent. Characteristics of the flows shown in this table may have coefficients of variation 10 percent or greater.]

The 1995 American Travel Survey

The American Travel Survey collected information from approximately 80,000 households about their long-distance travel in 1995. The ATS provides answers on how, why, where, when, and who travels in America.

The *Summary Travel Characteristics* publication series contains summary tables of travel statistics for census regions and divisions, States, and metropolitan areas. The tables in this report provide an overview of the findings of the American Travel Survey for each State and the District of Columbia. The printed versions of these Internet-based summary tables can be accessed electronically at <http://www.bts.gov/programs/ats>.
