Farm Classification:

Milk for Bottling

If a dairy farm fails to have any item under "1 - 7 inclusive", it shall not be admitted to the market for the major grade (usually Grade A) of bottled milk. A check on any item under this heading automatically requires reinspection. Failure to make correction requires rejection of the milk for bottling until all items are brought into compliance. The dairy farm shall not be scored on Sanitary Methods unless items 1 - 7 inclusive are in compliance.

The farms are to be scored on each item 8 through 14 with the following grades and numerical scores:

Excellent (E) =	100 percent
Good (G) =	80 percent
Poor (P) =	60 percent
Unsatisfactory (U) =	Zero

For example, a farm would receive 80 percent of 20 or 16 points on item 8 if compliance was judged good (G), 60 percent of 20 or 12 points for poor (P) compliance; and zero for unsatisfactory (U) compliance.

The scores shall be used to classify the farms as follows:

95 - 100	Excellent
80 - 94	Good
60 - 79	Reinspect
59 or less	Immediate rejection

A score of 79 or less on reinspection requires immediate rejection. The dairy shall be brought into compliance before being reinstated.

The sanitarian may call for a reinspection on the basis of several minor defects. Serious violation of any particular item may be considered grounds for exclusion.

Milk for Manufacture

A dairy farm producing milk for manufacture into sweet cream, ice cream, cottage and related cheese, and dry and concentrated milks may be rated on this score report with these exceptions. Item 4 shall not require hot water and a wash vat in the milk room, Item 5 shall require facilities for cooling to 60 F. or less. Item 12, cooling to 60 F. or less shall be deemed satisfactory. Since methods are just as important for milk for manufacture as milk for bottling the same system of scoring shall be used for it that is used for milk for bottling.

Public reporting burden for this collection of information is estimated to average 1.5 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to:
