2005 HAWAII REPORTED INJURIES AND ILLNESSES

In 2005, the number of reported injuries and illnesses increased by 1,697 or 6.4 percent to 28,018 and employment increased by 3.4 percent to 572,384. All industries, except for natural resources & mining, and arts, entertainment & recreation had increases in the number of reported cases. Health care & social assistance had the lowest percent increase at 1.4, while management of companies & enterprises had the highest percent increase at 43.2. Construction had the highest increase in the number of reported cases at 480 or 19.8 percent. This may be due to continued yearly increases in construction employment where more work hazards exist. On the other hand, natural resources & mining, and arts, entertainment & recreation decreased 16.1 percent and 3.4 percent respectively. The number of reported injuries and illnesses for information industry were stable over the year having 467 in both 2004 and 2005.

Natural resources & mining and arts, entertainment & recreation had decreases in their frequencies over the year with one in every nineteen workers and one in every twenty-two workers respectively. The frequencies for all other industries increased or remained the same. Construction continues to retain the highest frequency with one reported injury or illness for every eleven workers. Professional, scientific & technical services had the lowest frequency of reported cases with one injury or illness for every sixty workers, which may be due to a low hazard environment. Last year, management of companies & enterprises had the lowest frequency of injuries or illnesses with one for every seventy-two workers, but this year they had the highest increase in frequency of injuries or illnesses, with one reported case for every fifty-four workers.

The total number of back injury and illness cases with cost declined by 328 to 7,602 in 2005. Back injury cost decreased by 9.0% to \$61,319,055. Days lost for 2005 back cases decreased to 273,807 days from 312,506 days in 2004, a decrease of 12.4 percent.

The average cost per case was \$8,066 in 2005 compared to \$8,493 in 2004 decreasing by \$427. The nature category with the highest average cost per case in 2005 was fracture at \$18,089 decreasing \$573 from the previous year. The lowest average cost per case was in multiple traumatic injuries/disorders at \$4,903.

The sprains and strains category accounted for the highest cost in 2005 at \$31.8 million or 51.8 percent of total cost. Although the number of multiple traumatic injuries and disorders cases decreased, it had the highest percentage increase in costs and days lost standing at \$88,252 and 291 lost days. This may be due to the severity of the injuries. Musculoskeletal system and connective tissue cases cost and days lost experienced the highest percent decrease over the year. Cases with cost dropped 47.6% to 11 cases. Costs decreased 70.6% to \$101,328 and days lost decreased 84.8% to 275 days.

DEFINITIONS

Attendant Services Cost of services of an attendant for a totally disabled employee.

Average Cost Per CaseTotal compensation costs divided by the number of processed cases with cost.

Compensation Orders Decisions made on controverted cases, on awarding of permanent partial disability and disfigurement, and

on reopening cases.

Costs All payments accorded to a claimant to include disability, death, disfigurement, vocational rehabilitation,

attendant services, and medical payments.

Days Lost Number of compensated (calendar) days in which injured workers were not able to work because of

temporary total disability. This excludes the three-day waiting period.

Disfigurement Scar, deformity, discoloration, or other disfiguring consequences resulting from the injury or caused by

medical, surgical, and hospital treatment of the employee. This is separate from permanent partial

disability.

Employment That portion of the work force covered by Workers' Compensation law. Annual average taken from the

"Employment and Payrolls in Hawaii" report excluding federal government employees.

Event or Exposure Identifies the circumstance, which directly resulted in the injury or illness.

Industry Identifies employers by the major type of activity in which they are engaged.

Medical Physicians and hospital costs for services and supplies.

Nature of Injury or Illness Identifies the injury or illness in terms of its principal physical characteristic.

Occupation Identifies the nature of work of the employee.

Part of Body Identifies the part of the worker's body directly affected by the injury or illness.

permanent impairment of functions of the body or part thereof, regardless of any pre-existing disability.

Permanent Total Disability

Any injury or illness other than death, which permanently and totally incapacitates an employee from

following any gainful occupation.

Processed Cases Cases, which have been subject to screening procedures, the injury or illness medically evaluated, and all

medical costs and workers' compensation payments totaled. Includes injuries and illnesses, which

occurred in the report year or prior years.

Reported Injuries and Illnesses

(Reported Cases)

All injuries and illnesses reported to the Disability Compensation Division. These reported injuries or

illnesses may not have occurred during the report year.

Reported FatalitiesAny death resulting from an on-the-job injury or illness reported to the Disability Compensation Division.

Source of Injury or Illness Identifies the object, substance, exposure, or bodily motion, which directly produced or inflicted the injury

or illness.

Temporary Partial Disability A work injury or illness which causes partial rather than total disability for temporary periods. The

injured worker is paid a weekly benefit amount of 66-2/3 percent of the difference between his average

weekly wages before the injury and his weekly earnings thereafter for the duration of the disability.

Temporary Total Disability A common type of disability where the work injury or illness causes total disability for temporary periods.

The employer or insurance carrier, for the duration of the disability, but not including the first three days, pays the injured worker a weekly benefit amount of 66-2/3 percent of his average weekly wages, but not more than the maximum weekly benefit amount nor less than the minimum weekly benefit amount, or if his average weekly wages are less than the minimum weekly benefit amount, at a rate of 100 percent of

his average weekly wages.

Vocational Rehabilitation Cost of vocational rehabilitation services.

TECHNICAL NOTES

The Workers' Compensation Data Book is based on the annual accumulation of data in the State of Hawaii, Disability Compensation database.

- 1. The following coding systems and locally revised versions were used to categorize data:
 - a) Industrial attachment is determined by the principal activity of the employer as defined in the **North American Industry Classification System 2002 (NAICS)**. The new NAICS industry groupings better reflect the workings of the U.S. economy, particularly in the services sector. NAICS, developed using a production oriented conceptual framework, groups establishments into industries based on the activity in which they are primarily engaged. It is not an update of the Standard Industrial Classification (SIC) system. NAICS focuses on how products and services are created. More information on NAICS is available at the U.S. Census Bureau website at http://www.census.gov/epcd/www/naics.html.
 - b) Codes and definitions used to categorize Nature of Injury or Illness, Part of Body Affected, Source of Injury or Illness, and Event or Exposure were modeled after the 1992 Bureau of Labor Statistics (BLS) Occupational Injury and Illness Classification Structures (OIICS). Starting with 1996 data, BLS OIICS data codes were locally modified to 2 digits instead of 4 digits, making the data less detailed.
 - c) Occupational groups are based on the 1990 Alphabetical Index of Industries and Occupations, developed and published by the Bureau of the Census, Washington, D.C., U.S. Government Printing Office. Starting with 1996 data, the occupation classifications were locally modified, making the data less detailed.
- 2. From 1999, the employment data source used in the Worker's Compensation Data Book has been changed. Instead of the Labor Force Data Book employment we are using the Employment and Payrolls in Hawaii statistics. Employment data from the later publication may be more in line with workers covered under the Workers' Compensation program. Caution should be taken when reviewing the employment and frequency data for trend analysis prior to 1999.
- 3. From 2000, the table Hearings and Decisions Issued (previously called Compensation Orders Issued and Number of Hearings) has changed to include Act 59 settlements and attorney fees. The combined category Permanent Partial & Disfigurement no longer exists. Figures are reported under the category with the highest severity. For example: a case with disability payments and disfigurement award would be counted in the disability category and not in disfigurement.
- 4. Beginning with the **2002 Workers' Compensation Data Book**, there is a new format for the Industry category. The North American Industry Classification System (NAICS) is being used to designate the different industries instead of the Standard Industrial Classification (SIC) system. For trend analysis purposes, the data may not be comparable.
- 5. Effective with the **2004 Workers' Compensation Data Book**, the close date to process a "reported case" for the preceding calendar year was changed from January 31 to December 31 to accommodate the filing of electronic "WC-1 Employers Report of Industrial Injury". For trend analysis purposes, the data for 2004 may not be comparable.
