DRAFT

Project Eligibility Criteria and Prioritization Factors For the 2006-2009 Development STIP and Construction STIP **Process Overview**

Fligibility Criteria

Development STIP Major projects

Development work on major projects may be eligible for funding if it:

- Supports the definition of "Development STIP" approved by the Oregon Transportation Commission
- Addresses an unmet transportation need in the applicable acknowledged transportation system plan(s) (TSP) or, in the absence of an applicable acknowledged TSP(s), the applicable acknowledged comprehensive plan and any applicable adopted TSP(s).

Addresses project need, mode, function and general location for a transportation need identified in an acknowledged TSP.

Is identified as a project of statewide significance or as a federal discretionary project.

Has funding adequate to complete the identified milestone. 1

Eligibility Criteria					
Modernization projects	Construction STIP* Preservation projects	Bridge replacement/rehabilitation projects			
Modernization projects may be eligible for funding if they: Are consistent with the applicable acknowledged transportation system plan (TSP) or, in the absence of an applicable acknowledged TSP, the applicable acknowledged comprehensive plan and any applicable adopted TSP. Are consistent with the Oregon Highway Plan policy on Major Improvements (Policy 1G, Action1.G.1), where applicable. Modernization projects may be eligible for funding they.	Pavement Preservation projects may be eligible for funding if they: • Are identified through the Pavement Management System process. 11	Bridge replacement and rehabilitation projects may be eligible for funding if they: • Are identified through the Bridge Management System process. 15 • Are improvements or work needed to rebuild or extend the service life of existing bridges and structures (includes replacement of an existing bridge).			

^{*} To the extent that legislative action (e.g., HB 2041) applies, the criteria in the legislation will control in the event of a conflict. Draft Project Eligibility Criteria and Prioritizing Factors Page 1

Revised 09-17-03

Prioritization Factors Used to Select Projects for Funding from the Pool of Eligible Projects

Modernization projects	Construction STIP Preservation projects	Bridge replacement/rehabilitation projects		
 Priority shall be given to: Project readiness (an assessment of the likelihood of a project getting to construction in the timeframe contemplated). ⁷ Projects that best support the policies of the Oregon Highway Plan. ⁸ Projects that leverage other funds and public benefits. ⁹ Class 1 and 3 projects that have completed an environmental milestone of a Record of Decision (ROD) or Finding of No Significant 	Priority shall be given to: • Project readiness (an assessment of the likelihood of a project getting to construction in the timeframe contemplated). • Projects that best support the policies of the Oregon Highway Plan. • Projects that leverage other funds and public benefits.	— ·

Draft Project Eligibility Criteria and Prioritization Factors Process Description and Guidance For the 2006-2009 Development STIP and Construction STIP

I. Introduction

1 2

The Oregon Transportation Commission (OTC) approved the Project Eligibility Criteria and Prioritization Factors to assist Area Commissions on Transportation (ACTs), Metropolitan Planning Organizations (MPOs), or regional or statewide advisory groups advising the OTC on the selection of Statewide Transportation Improvement Program (STIP) projects. The document gives basic definitions and funding information and provides guidance pertaining to roles and responsibilities, project selection and documentation. More information about the ACT process, advisory committees, Oregon transportation management systems, other STIP programs and funding is available on the Internet (see Appendix A).

The OTC establishes program goals, funding levels and regional funding distribution at the start of each two-year STIP update. These policy decisions are made separate from these eligibility criteria and prioritization factors and are not part of this document. (See Appendix B for the decision-making process.)

A. Roles and Responsibilities

The OTC will make the final selections for all projects included in the STIP. The Commission will consider the advice and recommendations that it receives from ACTs, MPOs and regional or statewide advisory groups. ODOT will provide tools necessary to enable an ACT to carry out its responsibilities under these criteria. Geographic areas that do not have an ACT must adhere to the same standards of accountability as ACTs (*Policy on Formation and Operation of the Area Commissions on Transportation*, Section VI, Basis for Decision Making) and demonstrate to the OTC that recommendations were developed in accordance with these criteria and factors. In making final project selections, the OTC will ensure that ACTs, MPOs and regional or statewide advisory groups have based their considerations on the criteria and will ensure projects are distributed according to the funding allocations approved by the OTC for the 2006–2009 STIP.

In making decisions, the OTC applies both regional and statewide perspective, optimizes system effectiveness in decisions for the state system and strives to develop and operate an integrated intermodal transportation system that facilitates the safe, efficient and economic movement of people and goods. (*Policy on Formation and Operation of the Area Commissions on Transportation*, Section III. Authority)

B. Definitions

STIP includes both the Development and Construction sections of the Statewide Transportation Improvement Program. The D-STIP houses projects that require more than 4 years to develop or for which construction funding needs to be obtained. Projects that can complete the development process and be ready for bid within 4 years or less may be placed directly into the C-STIP.

Development STIP (D-STIP)

The Oregon Transportation Commission approved the following definition for the D-STIP:

Projects approved and funded for development through specific milestones and within specific timeframes, which include the following characteristics:

A. Projects approved for funding through specific milestones such as National Environmental Policy ACT (NEPA) design-level environmental documents, right of way acquisition, and final plans; or

B. Projects for which needed improvements have been identified but a final solution either has not been determined or needs further design and analysis.

The types of projects that tend to have one or more of the above characteristics include large statewide significant projects, federally earmarked or demonstration projects, modernization or major bridge replacement projects, and discretionary projects (projects eligible to receive federal discretionary funds).

Construction STIP (C-STIP)

The C-STIP identifies project scheduling and funding for the state's transportation preservation and capital improvement program for a four-year construction period. This program meets the requirements of the Transportation Equity Act for the 21st Century (TEA-21), the federal act that provides funds to states for transportation projects. For application of these criteria and prioritization factors, C-STIP means Modernization, Preservation and Bridge projects.

Other STIP Programs

Other STIP programs (examples include Safety, Bicycle/Pedestrian, Transit, Congestion Mitigation/Air Quality Improvement, Transportation Enhancement, and Scenic Byways) are not addressed in this document. More information about programs funded in the STIP is available in the *Draft 2004-2007 STIP*.

C. Project Selection

Eligibility Criteria and Prioritization Factors have been developed for both the Development STIP (D-STIP) and the Construction STIP (C-STIP). ACTs, MPOs and others, including those where an ACT does not exist, shall apply both regional and statewide perspectives in making their recommendations. The Commission anticipates that most projects considered by ACTs, MPOs and regional or statewide advisory groups would be the outcomes of planning and the transportation management systems maintained by ODOT. ODOT Region staff shall assist the ACT in developing recommendations as described in the *Policy on Formation and Operation of the ACTS*, Section II. D, Role of ODOT Staff.

ACTs, MPOs and regional or statewide advisory groups should use this document as a guide when they evaluate projects for the STIP on the state highway system and for off-system projects that support implementation of the Oregon Highway Plan (OHP). Projects recommended for funding in the STIP should have consistent application of the project eligibility criteria and prioritizing factors. ACTs, MPOs and regional or statewide advisory groups may use additional criteria to select and rank projects provided the criteria are consistent with the

Draft Project Eligibility Criteria and Prioritizing Factors Revised 09-17-03

project eligibility criteria and prioritization factors adopted by the OTC. If requested, ODOT staff will provide a model to assist with project ranking. This process recognizes regional differences and is consistent with the Oregon Transportation Plan (Policy 2G) and the Policy on Formation and Operation of the Area Commissions on Transportation, Section VI, Basis for Decisionmaking.

In MPO areas designated as Transportation Management Areas (TMA), all projects using federal title 23 or Federal Transit Act funds, except projects on the NHS and projects funded under the Bridge, Interstate Maintenance and Federal Lands Highways programs, shall be selected by the MPO in consultation with the State and transit operator from the approved metropolitan Transportation Improvement Program (TIP). Projects on the NHS and projects funded under the Bridge and Interstate Maintenance programs shall be selected by the State, in cooperation with the MPO, from the approved metropolitan TIP.

In MPO areas not designated as TMAs, projects using federal title 23 or Federal Transit Act funds, other than Federal Lands Highways program funds, shall be selected by the State and/or the transit operator, in cooperation with the MPO, from the approved metropolitan TIP.

Outside MPO areas, transportation projects undertaken on the NHS and projects funded under the Bridge and Interstate Maintenance programs will be selected by the State in consultation with the affected local officials. Other transportation projects undertaken with funds administered by FHWA, other than federal lands highway projects, shall be selected by the State in cooperation with the affected local officials and projects undertaken with Federal Transit Act funds shall be selected by the State in cooperation with the appropriate affected local officials and transit operators (23 Code of Federal Regulations part 450).

ACTs and MPOs should coordinate their efforts to assure a better decision making process which results in better coordination of projects. When ACT and MPO boundaries overlap, a higher level of clearly defined coordination is needed. Where this occurs, the MPO and ACT should jointly agree on a process for maintaining consistency between ACT recommendations and the MPO Plan and TIP (Policy on Formation and Operation of the Area Commissions on Transportation, Section VII. G, Coordination).

ACTs, MPOs, or regional or statewide advisory groups advising the OTC on the selection of STIP projects for funding on the state highway system or for off-system projects that support implementation of the OHP shall apply the project eligibility criteria. The project eligibility criteria are a first screen so that additional efforts can be focused to determine which projects they will evaluate further for funding. The eligibility criteria are not listed in any particular order. Projects must satisfy these criteria, at a minimum, before they are given further consideration.

The prioritization factors are to be used to ensure consistent consideration of the relative merits

Prioritization Factors

Project Eligibility Criteria

of projects by ACTs, MPOs and regional or statewide advisory groups. With the exception of project readiness which shall have greater weight, the prioritization factors are not listed in any particular order and do not have any implied weight. To provide for regional differences, ACTs, MPOs and regional or statewide advisory groups may use additional factors to rank projects provided the factors are consistent with the factors adopted by the OTC. If an ACT, MPO or regional or statewide advisory group chooses to use additional prioritization factors, they must

inform those developing project proposals about the factors prior to the beginning of the project submittal period. When developing a tool to evaluate OHP policies, OHP Appendix A2 provides definitional information to facilitate shared understanding of the goals, policies and actions of the OHP policy element.

D. Project Documentation

ACTs, MPOs and regional or statewide advisory groups making recommendations to the OTC shall document the analysis used to develop recommendations. The supporting information should include the following:

1. Project description

2. Project justificationIdentify the planning history

 As applicable, describe information provided from the pavements or bridge management system. If the recommendation varies from the prioritization identified by the management system, describe the process used to reach that recommendation.

• Describe how this project supports OHP policies (Table 1).

 Provide an assessment of the likelihood of the project getting to construction in the timeframe contemplated

 Provide supplementary project information if the project leverages additional funding or community benefit

3. Applicable additional information

E. Funding

As required by federal regulations (23 CFR Part 450) the C-STIP is financially constrained by year. The Eligibility Criteria and Prioritization Factors defined in this document apply to projects that implement current revenue sources. If more funding becomes available, it will be allocated in adherence to any additional funding or selection criteria attached to those new funds.

The STIP represents multiple funding categories and each category has limits as to how the funding can be obligated. STIP projects must meet the funding source limitations established by state or federal regulations and cannot be selected without looking at those limitations. The D-STIP will be funded with the same funding sources as the C-STIP and the total funds committed to the D-STIP may vary. Funding of the D-STIP can be impacted by several factors, including the following: OTC selection of projects of statewide importance, federally funded earmarks and discretionary projects, federal and state restrictions on the use of available funds, and the Regional equity distribution of Modernization funds (ORS 366.507).

II. Development STIP (D-STIP)

A. Introduction to the D-STIP

legislation.

The Oregon Transportation Commission will make the final selections for all D-STIP projects and will apply a statewide perspective to the proposed list of projects, giving highest priority to

It will be important to clearly articulate the rationale and need of a D-STIP project in order to help manage expectations and potential next steps. D-STIP projects will be consistent with statewide policies and may be identified in one or more planning documents, such as transportation system plans, regional transportation plans, corridor plans, comprehensive plans, refinement plans or state management systems. Additionally, the OTC may select large projects of statewide significance for inclusion in the D-STIP. The D-STIP includes projects approved and funded for development through specific milestones for planning, environmental or project development activities and within specific timeframes.

The following should be considered when applying the Eligibility Criteria and Prioritization Factors:

OTC approved federal discretionary projects that have funding secured through federal

A new alignment will be selected for one or several features in the refinement plan. Project specific refinement plans may be funded in the D-STIP as needed to resolve need, function, mode and general location decisions that could not be made during system plan or corridor plan development. In circumstances where these decisions have already been made, the goal of refinement planning will be to develop a specific solution or a range of solutions to the problems(s) that support the next appropriate project development step.

 Rapid development is occurring in the area, making corridor preservation critical.
Issues needing resolution have a high priority and solutions are likely to be funded in the near future.

The highway segment is very sensitive environmentally, and a strategy for the whole segment needs to be approved before work on individual elements can commence. For example, addressing land use to help resolve inconsistencies with planned transportation facilities; planning for compatible land uses along state highways.
 Public pressure for a sustainable decision is high.

Selection of D-STIP projects requires application of the D-STIP definition approved by the OTC. D-STIP projects generally fall into the following three categories: federal discretionary projects (earmarks), large statewide significant projects, and modernization or major bridge replacement projects.

Federal discretionary projects

Federal discretionary projects are a part of federal appropriations or transportation funding legislation. The Oregon Department of Transportation, with direction from the Oregon Transportation Commission, developed guidelines to use in deciding which projects should be submitted as earmark proposals in federal legislation for the reauthorization of transportation funding. The projects are categorized as low or medium risk and can be completed over the life of the federal transportation funding bill. Local jurisdictions that pursue earmark funding for

projects not submitted by ODOT are solely responsible for the required matching funds or any shortfalls.

Large statewide significant projects

Large statewide significant projects are projects that require funding that cannot be achieved within standard STIP allocations but are viewed by the OTC as projects of statewide significance and can be selected by the OTC independent of the ACT process. Identified funds would be used to either keep existing work on very large projects current, or to support development of very large projects (for example, funding a new Environmental Impact Statement or updating an existing EIS).

Modernization or major bridge replacement projects

Modernization or major bridge replacement projects are projects that have been approved and funded for development through specific milestones but that cannot be constructed within the four-year timeframe of the STIP and/or within the normal Region STIP allocations. These may include shelf projects, which are high priority projects developed in anticipation of funding but that have no funding identified for construction in the current STIP. Milestones include planning, environmental and project development.

D-STIP Project Completion

Projects remain in the D-STIP until work required to meet the National Environmental Policy Act (NEPA) is completed. NEPA classifications:

 Class 1: Requires draft and final environmental impact statement (EIS). An EIS is required for actions that significantly affect the environment.

 Class 2: Categorical exclusion (neither an environmental assessment nor an environmental impact statement is required). These actions do not individually or cumulative have a significant environmental effect and are excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Class 3: Requires environmental assessment (EA) or revised environmental assessment. The environmental impact is not clearly established. All actions that are not Class 1 or 2 fall into this classification. These actions require preparation of an EA to determine the appropriate environmental document. If it is determined that the action is likely to have a significant impact on the environment, the preparation of an EIS will be required.

All Class 1 and 3 projects should be in the D-STIP until a final Record of Decision (ROD) or Finding of No Significant Impact (FONSI) has been completed. By programming completion of D-STIP milestones that follow a ROD or FONSI, the project delivery activity can continue through right of way acquisition, advance plans, and/or plans specifications and estimates (PS&E). The project could then be ready for inclusion in the C-STIP at the regular 2-year update. Work on right of way, advance plans or PS&E may be conducted in either the D-STIP or the C-STIP.

ODOT and the Department of Land Conservation and Development (DLCD) shall work with affected cities and counties to obtain land use approvals needed to select a specific alignment. After completion of the Draft EIS or EA they will resolve any other project specific land use

issues. The level of land use consistency required will depend on the environmental milestone being completed.

Although the primary purpose of the D-STIP is to develop projects for the C-STIP, inclusion in the D-STIP does not guarantee funding for future D-STIP milestones or that a project will automatically move into the C-STIP. Funding may not be available to construct the final solution or the environmental document may identify the solution as a "No Build".

Development STIP

 В.

B. 1. Development STIP Eligibility Criteria Footnotes

¹D-STIP milestones

D-STIP projects must have funding to complete the identified milestone; partial milestones or those with no funding will not be programmed. D-STIP milestones, while not necessarily sequential, include those listed below. Not all projects are required to complete all the milestones.

- Project specific refinement plan completion
- Project specific refinement plan adoption
- Land use consistency/Statewide Goal Compliance. (Project is included in the
 acknowledged comprehensive plan or transportation system plan as a planned
 facility, which is a facility allowed by the plan and that is expected to be
 constructed within the next 20 years with available financial resources. This may
 include land use decisions that establish need, mode, function and general
 location.)
- Location Environmental Impact Statement (EIS) Record of Decision (ROD)
- Design EIS ROD
- Environmental Assessment (EA) and Finding of No Significant Impact (FONSI)
- Right of way acquisition
- Advance plans (or any other applicable project development design milestone)
- Plans, specifications and estimates (PS&E)

B.2. Development STIP Prioritization Factors Footnotes

²D-STIP Projects that Best Support the Oregon Highway Plan Policies

 Oregon Highway Plan policies that are applicable to D-STIP projects may include but are not necessarily limited to the following (Table 1):

 ◆ 1A, 1B, 1C, 1D, 1F, 1G, 1H, 2A, 2B, 2C, 2E, 2F, 2G, 3A, 3B, 3C, 4A, 4B, 4C, 4D, 4E, and 5A

³Funding for D-STIP Projects

A funding scenario should be identified through construction, though not necessarily guaranteed. Congressional high priority projects would fall into this category.

⁴Leverage and Public Benefit for D-STIP Projects

ACTs, MPOs and regional or statewide advisory groups should evaluate how proposed projects leverage additional funding or collateral community benefits and make wise and efficient use of infrastructure and natural resources. Those making project recommendations should pursue an agenda to accomplish leverage or community benefits although specific benefits might not

always be known at the D-STIP stage. Examples of leverage and public benefits for D-STIP modernization projects could include where applicable, but are not limited to the following:

2 3 4

5

6

7

8

9

11 12

13

14

15

16 17

18

- Other funding contributions, such as additional federal funds, local matching funds or provision of project right of way, private funding.
- Bundling with other infrastructure projects (provided there is no adverse affect on project readiness).
- Fish enhancement, such as culvert replacement and improved drainage.
- Transfer of jurisdiction from state to local control.
- Leveraging additional funds that contribute to transportation system effectiveness, revitalization of the downtown or mainstreet, etc.
- Direct benefits to multiple modes of travel. This would include local efforts to accommodate non-auto modal opportunities.
- Local circulation improvements that support and complement the state highway project.
- Improvements in Oregon's economy by addressing transportation challenges.
- Potential for collecting toll revenues.
- Projects that implement other innovative finance techniques.

III. Construction STIP (C-STIP)

1 2

A. Introduction to the C-STIP

The C-STIP contains projects scheduled for construction and is financially constrained by year. Application of the C-STIP Eligibility Criteria and Prioritization Factors includes Modernization, Preservation and Bridge projects. Information about other programs in the STIP may be found in the *Draft 2004-2007 STIP*.

B. Modernization

As stated in the 1999 Oregon Highway Plan, "The primary goal of modernization projects is to add capacity to the highway system in order to facilitate existing traffic and/or accommodate projected traffic growth. Modernization means capacity-adding projects including HOV lanes and off-system improvements. Projects in this category include major widening of lanes or bridges, and the addition of lanes, rest areas or entire facilities." Where a culvert is replaced with a bridge due to environmental analysis concluding that this is necessary, the project is not considered modernization.

B.1. Construction STIP Eligibility Criteria for Modernization Footnotes

⁵Consistency with Comprehensive Plans and Transportation System Plans (TSP)

The proposal must show that the project is consistent with the applicable adopted comprehensive plan or transportation system plan as a planned facility, including land use decisions that establish need, mode, function and general location, including goal exceptions, where required. If consistency cannot be demonstrated the project submission will describe how the inconsistency will be addressed, including changes to the project, TSP and/or comprehensive plan and when they need to be completed. In such cases, the ACT or regional or statewide advisory group may recommend that the project be included in the D-STIP, and request that Transportation Planning Rule issues be addressed.

Proposed projects from within MPOs shall be identified in fiscally constrained Regional Transportation Plans and shall meet air quality conformity requirements.

⁶Consistency with Oregon Highway Plan (OHP) Policy 1G, Action 1G.1, on Major Improvements

In order to demonstrate that a project is consistent with OHP Policy 1G, Action 1G.1, the proposal must show that the project and/or the TSP clearly addressed the prioritization criteria found in Action 1G.1 of the OHP.

Where needed to achieve consistency with the above-noted Oregon Highway Plan policy, the ACTs, MPOs, or regional or statewide advisory groups, with ODOT assistance, shall negotiate conditions for project approval with an applicant. These conditions, if not addressed as the project proceeded through the D-STIP if applicable, shall be attached to the application approved by the ACT, MPO or regional or statewide advisory group, shall be as specific as possible given the stage of development of the project, and may include the following:

- Access management and interchange area management plans,
- Highway segment designations,
- Needed local street improvements,
- Traffic management plans,

Other similar conditions.

4

B.2. Construction STIP Prioritization Factors for Modernization Footnotes

5 6

7

8

9

⁷Project Readiness for C-STIP Modernization Projects

Projects that can begin construction within the timeframe of the STIP and within the timeframe expected are considered to be more ready than those that have many or complicated remaining steps. The overall judgement of a project's readiness is dependent on timeliness of construction expectations not on the number of steps to be completed.

10 11

12 13

15 16

14

17 18

35

40 41

42

43

44

45 46

47 48

49 50

51

Where applicable, the hurdles to accomplish each of the following steps must be assessed for major modernization projects that have come through the D-STIP and for which a final Record of Decision (ROD) for a design level environmental impact statement or a Finding of No Significant Impact (FONSI) has been made:

- Public involvement
- Right of way purchased
- Final construction and traffic flow management plans developed
- Additional land use requirements such as completing plans for access management. supporting local transportation system improvements and land use measures to protect the function and operation of the project.

Projects that have not gone through the D-STIP or have not completed a FONSI or ROD must also assess the following:

- Environmental requirements
- Land use requirements
- Applicability of minor improvements and alternative mode solutions

For all projects, if those aspects are not completed at the time of the assessment of project readiness, a plan to complete them must be described to assist in judging the likelihood that all of those aspects can be addressed, and construction begun within the timeframe projected. The project budget and time line must include execution of the plan.

8 Modernization Projects that Best Support the Oregon Highway Plan Policies

OHP policies that are applicable to modernization projects may include but are not necessarily limited to the following (Table 1):

1A, 1B, 1C, 1D, 1F, 1G, 1H, 2A, 2B, 2C, 2E, 2F, 2G, 3A, 3B, 3C, 4A, 4B, 4C, 4D, 4E, and 5A

⁹Leverage and Public Benefit for C-STIP Modernization Projects

ACTs, MPOs and regional or statewide advisory groups should evaluate how proposed projects leverage additional funding or collateral community benefits and make wise and efficient use of infrastructure and natural resources. Examples of leverage and public benefits for C-STIP modernization projects include:

- Other funding contributions, such as additional federal funds, local matching funds or provision of project right-of-way, private funding.
- Bundling with other infrastructure projects (provided there is no adverse affect on project readiness).
- Fish enhancement, such as culvert replacement and improved drainage.

35

43 44 45

46

47 48

49 50

- Transfer of jurisdiction from state to local control.
- Leveraging of additional funds that contribute to transportation system effectiveness. revitalization of the downtown or mainstreet, etc.
- Direct benefits to multiple modes of travel. This would include local efforts to accommodate non-auto modal opportunities.
- Local circulation improvements that support and complement the state highway project.
- Improvements in Oregon's economy by addressing transportation challenges.
- Potential for collecting toll revenues.

¹⁰Environmental Classification

- Projects that implement other innovative finance techniques.
- Class 1: Requires draft and final environmental impact statement (EIS)
- Class 2: Categorical exclusion (neither an environmental assessment nor an environmental impact statement is required)
- Class 3: Requires environmental assessment (EA) or revised environmental assessment

This prioritization factor is not intended to give Class 1 and 3 projects priority over or to exclude Class 2 projects, but to give Class 1 and 3 projects with a completed ROD or FONSI priority over Class 1 and 3 projects that require additional environmental documentation.

Preservation

The pavement preservation projects list is developed by ODOT's Pavement Management System (PMS) and applied by the pavement management selection committees. The PMS is an electronic data management tool used by the department to identify, prioritize and develop needed pavement preservation projects. The role of ACTs, MPOs and regional or statewide advisory groups is to review the timing of the pavement preservation projects as they relate to other local projects or issues; their comments will be considered as part of the process. It is anticipated that these groups will primarily enhance selected projects by leveraging additional funding or collateral community benefit. The interstate preservation projects are selected based on the PMS and a statewide strategy and are therefore not a part of these criteria.

C.1. Construction STIP Eligibility Criteria for Pavement Preservation Footnotes

The department has adopted a pavement preservation program designed to keep highways in the best condition at the lowest lifecycle cost, taking into account available funding. ODOT established a Pavement Strategy Committee in 1999 to address pavement preservation issues, including the development of a statewide pavement strategy for all state highways. The pavement strategy was developed using the department's Pavement Management System. The strategy assumes maintenance of existing traffic capacity; it does not provide for capacity

improvements.

Using the list generated by the Pavement Management System (PMS), each Region is responsible for recommending preservation projects for inclusion in the STIP.

C.2. Construction STIP Prioritization Factors for Pavement Preservation **Footnotes**

¹¹Pavement Strategy

¹²Project Readiness for C-STIP Preservation Projects

- Projects that can begin construction within the timeframe of the STIP and within the timeframe
- 2 3 4 5 expected are considered to be more ready than those that have many or complicated remaining
- steps. The overall judgement of a project's readiness is dependent on timeliness of
- construction expectations not on the number of steps to be completed.

 D.

¹³Preservation Projects that Best Support the Oregon Highway Plan Policies

Oregon Highway Plan policies that are applicable to preservation projects may include but are not necessarily limited to the following (Table 1):

1A, 1B, 1C, 1D, 1E, 2A, 2C, 2F, 3A, 4A, and 5A

¹⁴Leverage and Public Benefit for C-STIP Preservation Projects

ACTs, MPOs and regional or statewide advisory groups should evaluate how proposed projects leverage additional funding or collateral community benefits and make wise and efficient use of infrastructure and natural resources. Examples of leverage and public benefits for C-STIP pavement preservation projects include:

- Other funding contributions, such as additional federal funds, local matching funds or provision of project right-of-way, private funding.
- Bundling with other infrastructure projects (provided there is no adverse affect on project readiness).
- Fish enhancement, such as culvert replacement and improved drainage.
- Transfer of jurisdiction from state to local control.
- Leveraging of additional funds that contribute to transportation system effectiveness, revitalization of the downtown or mainstreet, etc.
- Direct benefits to multiple modes of travel. This would include local efforts to accommodate non-auto modal opportunities.
- Local circulation improvements that support and complement the state highway project.
- Improvements in Oregon's economy by addressing transportation challenges.

Bridge

The process of identifying bridge projects for the STIP is two-fold in nature (1) bridges are inspected at least every two years, in order that the most current inspection information is used to develop a list of bridges and (2) the use of a Bridge Management System (BMS). The BMS is an electronic data management tool used by the department to identify, prioritize and develop needed bridge improvements. BMS data are linked to other technical databases to identify bridges that meet twelve separate deficiency parameters. Applying this information, the State Bridge Oversight Committee develops a prioritized list. The role of ACTs, MPOs and regional or statewide advisory groups is to review the timing of the bridge replacement/rehabilitation projects as they relate to other local projects or issues; their comments will be considered as part of the process. It is anticipated that these groups will primarily enhance selected projects by leveraging additional funding or collateral community benefit.

D.1. Construction STIP Eligibility Criteria for Bridge Footnotes

¹⁵Bridge Management System

7

8

9

1

6

State Bridge Project Selection

This criterion applies to bridges on the State highway system only. Through a formula distribution, 27% (% periodically reassessed) of the federal Highway Bridge Replacement and Rehabilitation Project funds go to local bridges, which are covered through a separate selection process.

10 11 12

State bridge projects proposed for funding will be selected based on the desire to maintain and improve transportation's role in Oregon's economy.

13 14 15

Focusing on the Interstate Highway and Oregon Highway Plan Freight Routes, consider bridges as candidates based on the following:

16 17 18

Bridges that are presently load restricted.

19

Bridges that have needed temporary repair but still have some load restrictions.

20 21 Bridges that have deterioration that will cause load restrictions in the near future. Bridges that preserve freight corridors

22

D.2. Construction STIP Prioritization Factors for Bridge Footnotes

23 24

¹⁶Bridge Options Report

25 26

27

Priority will be given to projects that support the Bridge Options Report adopted by the Oregon Transportation Commission. Bridges that increase lane capacity are included under modernization and must meet the modernization criteria and prioritization factors.

28 29 30

¹⁷Leverage and Public Benefit for C-STIP Bridge Projects

31 32

33

34

ACTs, MPOs and regional or statewide advisory groups should evaluate how proposed projects leverage additional funding or collateral community benefits and make wise and efficient use of infrastructure and natural resources. Examples of leverage and public benefits for C-STIP bridge replacement/rehabilitation projects include:

35 36 37

38

Other funding contributions, such as additional federal funds, local matching funds or provision of project right-of-way, private funding.

39 40 Bundling with other infrastructure projects (provided there is no adverse affect on project readiness). • Fish enhancement, such as culvert replacement and improved drainage.

41 42

43

 Direct benefits to multiple modes of travel. This would include local efforts to accommodate non-auto modal opportunities.

44 45

Improvements in Oregon's economy by addressing transportation challenges.
