ENERGY STAR®, a U.S. Environmental Protection Agency and U.S. Department of Energy program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit www.energystar.gov.

ENERGY STAR Qualified Room Air Cleaners AT A GLANCE

What is ENERGY STAR?

- The U.S. government-backed symbol for energy efficiency.
- A program dedicated to identifying products that save energy without sacrificing quality or performance.

Why Buy ENERGY STAR Room Air Cleaners?

Save energy

- Qualified room air cleaners are **44% more efficient** than standard models.
- They use less energy to remove particles from indoor air, such as pollen or dust.

Save money

- Choosing qualified room air cleaner can help you **save \$35 a year** on electricity bills.

Save the environment

- By using less energy, qualified air cleaners **reduce greenhouse gas emissions** caused by burning fossil fuels at power plants. Since 2004, ENERGY STAR qualified air cleaners have saved 900 million kWh and prevented 1 billion pounds of greenhouse gas emissions.

Energy Fact:

- In 2007 alone, Americans—with the help of ENERGY STAR—saved \$16 billion on their utility bills and prevented greenhouse gas emissions equivalent to the annual emissions of 27 million vehicles.

Additional Information for Your Customers

- A typical room air cleaner, operating continuously, uses approximately 760 kWh per year in electricity—this is 50% more than the power used by a new refrigerator! Choosing an ENERGY STAR qualified room air cleaner is an easy way to save energy and help protect the environment.
- Some qualified models offer additional features such as remote control or clock functions.
- Qualified air cleaners must meet energy efficiency requirements based on the electricity used to remove contaminants, such as dust, from the air. Please note, EPA does not endorse any manufacturer claims of healthier indoor air from the use of this product.
