Migratory Birds; Proposed Rule**

**DEPARTMENT OF THE INTERIOR****Fish and Wildlife Service****50 CFR Part 10**

RIN 1018-AB72

**General Provisions; Revised List of Migratory Birds****AGENCY:** Fish and Wildlife Service, Interior.**ACTION:** Proposed rule.

**SUMMARY:** We propose to revise the List of Migratory Birds by (1) adding 1 species that belongs to a family covered by the Canadian and Mexican treaties and that is now known to occur and breed regularly in the United States; (2) adding 2 species covered by the Japanese and Russian treaties that were mistakenly omitted from previous lists; (3) adding 1 species of regular occurrence in the United States that now belongs to a protected family as a result of a recent taxonomic revision; (4) adding 26 newly recognized species; (5) removing 1 species that is no longer considered valid; (6) changing the English (common) and scientific names of 78 species to conform with modern nomenclature; and (7) correcting an error in the common (English) name of 1 species. The net result of these proposed changes is the addition of 29 species (25 by name only), which will bring the total number of protected species to 861; only 4 of the 29 proposed additions are not currently covered by the existing list as former subspecies of a listed species.

**DATES:** Comments must be submitted on or before November 13, 2001.**ADDRESSES:** Written comments may be mailed to the Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 634, Arlington, VA 22203. Alternatively, comments may be e-mailed, with Migratory Birds in the subject line, to John L. Trapp ([john\\_trapp@fws.gov](mailto:john_trapp@fws.gov)). The complete file for this rule will be available for public inspection during normal business hours, by appointment, at the above address.**FOR FURTHER INFORMATION CONTACT:** Jon Andrew, Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, telephone: (703) 358-1714.**SUPPLEMENTARY INFORMATION:****What Statutory Authority Does the Service Have for This Rulemaking?**

We have statutory authority and responsibility for enforcing the

Migratory Bird Treaty Act (MBTA) in 16 U.S.C. 703-711, the Fish and Wildlife Improvement Act of 1978, 16 U.S.C. 712, and 16 U.S.C. 742a-j. The MBTA implements treaties between the United States and four neighboring countries for the protection of migratory birds, as follows:

(1) Canada: Convention for the Protection of Migratory Birds, August 16, 1916, United States-Great Britain (on behalf of Canada), 39 Stat. 1702, T.S. No. 628;

(2) Mexico: Convention for the Protection of Migratory Birds and Game Mammals, February 7, 1936, United States-United Mexican States (=Mexico), 50 Stat. 1311, T.S. No. 912;

(3) Japan: Convention for the Protection of Migratory Birds and Birds in Danger of Extinction, and Their Environment, March 4, 1972, United States-Japan, 25 U.S.T., 3329 T.I.A.S. No. 7990; and

(4) Russia: Convention for the Conservation of Migratory Birds and Their Environment, United States-Union of Soviet Socialist Republics (=Russia), November 26, 1976, 92 Stat. 3110, T.I.A.S. 9073, 16 U.S.C. 703-712.

**What Is the Purpose of The Proposed Rulemaking?**

Our purpose is to inform the public of the species protected by regulations designed to enforce the terms of the MBTA. These regulations are found in Title 50, Code of Federal Regulations (CFR), Parts 10, 20, and 21. We regulate most aspects of the taking, possession, transportation, sale, purchase, barter, exportation, and importation of migratory birds. An accurate and up-to-date list of species protected by the MBTA is essential for regulatory purposes.

**Why Is The Proposed Amendment to the List of Migratory Birds Necessary?**

The proposed amendment is needed to (1) add a species that belongs to a protected family and that is now known to occur and breed regularly in the United States, (2) add two species covered by the Japanese and Russian treaties that were mistakenly omitted from previous lists, (3) add a species of regular occurrence in the United States that now belongs to a protected family as a result of recent taxonomic revisions, (4) add 26 newly recognized species by name, (5) remove a species that is no longer considered valid, (6) change the common (English) and scientific names of 78 species to conform with modern nomenclature, and (7) correct an error in the existing list. Twenty-nine species will be added by name, but in fact only four will be

newly covered (the other 25 having previously been covered as subspecies of a listed species).

The List of Migratory Birds (50 CFR 10.13) was last revised on April 5, 1985 (50 FR 13710). In a proposed rule published May 9, 1995 (60 FR 24686), we suggested adding 20 species, removing 1 species, and revising the common (English) or scientific names of 23 previously listed species to conform with the most recent nomenclature. The proposed amendments were a response to five published supplements to the 6th (1983) edition of the American Ornithologists' Union's (AOU's) *Check-list of North American birds*. Knowing that additional amendments would be necessary following the anticipated publication of a 7th edition of the *Check-list*, we elected to delay publication of a final rule until after the appearance of the revised *Check-list*. The 1995 proposed rule generated just two public comments, from the American Ornithologists' Union and the Association of Scientific Collections. The comments of those organizations, mostly editorial in nature, are incorporated into this document, as appropriate.

Following publication of the 7th edition of the *Check-list* in July 1998, administrative workloads and staff shortages prevented work on a final rule until September 2000. Because of the 5-year delay since publication of the proposed rule, plus the many new changes necessitated by the 7th edition of the *Check-list*, we are issuing another proposed rule. This will provide the public with an opportunity to review and comment on all of the desired changes that have come to light since publication of the 1995 proposed rule.

**What Scientific Authorities Does the Service Use To Amend the List of Migratory Birds?**

Although bird names (common and scientific) are relatively stable, there is still a need for standardized usage to avoid confusion in communications. We follow the *Check-list of North American birds* (AOU 1998), as amended (AOU 1999, 2000), on matters of taxonomy, nomenclature, and the sequence of species and other higher taxonomic categories (orders, families, subfamilies). For the few species that occur outside the geographic area covered by the *Check-list* (AOU 1998, 1999, and 2000), we follow Monroe and Sibley (1993). Citations for these authorities follow:

### What Criteria Does the Service Use To Identify Species Eligible for Protection by the MBTA?

The treaties with Canada and Mexico indicate, by scientific names of families or groups or by the common (English) names of species or groups of species, which birds were intended to be covered. We generally do not include species of purely accidental or casual occurrence in the United States, even if they belong to one of the named families or groups. Similarly, we do not list species whose occurrence in the United States is strictly the result of intentional human introduction(s).

The Japanese and Russian treaties list individual species of birds that are covered. For 35 of these species, the scientific (genus or species) name currently recognized by scientific authorities (AOU 1998 and 1999, Monroe and Sibley 1993) differs from that which appears in the treaties. The following cross-reference provides a linkage between the scientific names used in this list and those that appear in the appendices to the Japanese and Russian treaties. The first name is the modern equivalent adopted here, and the second name is that which appears in one or another of the treaties. These changes do not revise the appendices to either the Japanese or the Russian treaty (indicated by J or R):

### How Will the Changes Proposed Here Affect the List of Migratory Birds?

The proposed amendments address a grand total of 109 species and would result in a net addition of 30 species to the List of Migratory Birds, bringing the species total to 862. Only four species, though, are not already covered. Under these amendments, as proposed:

(1) One species would be added because of recent evidence that it occurs regularly in the United States: Tanager, Flame-colored, *Piranga bidentata*

(2) Two species would be added because they are included in the Appendix of the Russian treaty and in the Annex to the Japanese treaty, respectively; the omission of these species in previous lists is considered an oversight: Duck, Spot-billed, *Anas poecilorhyncha*; and

Gull, Black-tailed, *Larus crassirostris*

(3) One species would be added because it occurs regularly in the United States, and recent taxonomic changes place it in a family (Sylviidae) covered by the Canadian and Mexican treaties: Millerbird, *Acrocephalus familiaris*

(4) Twenty-six species would be added because of recent taxonomic changes; what was once considered a single species is now recognized by authorities as two or more species. These additions will not change the protective status of these taxa, only the names by which they are known:

### How Do the Changes Proposed Here Differ From Those Discussed in the 1995 Proposed Rule?

The proposal to add Green Sandpiper (*Tringa ochropus*) and Oriental Turtle-Dove (*Streptopelia orientalis*) on the basis of recent distributional records is withdrawn pending additional evidence that they occur regularly in the United States. We propose adding the Flame-colored Tanager to the list on the basis of recent evidence that it occurs and breeds regularly in the United States, and because it belongs to a family (Thraupidae) covered by the Canadian and Mexican treaties.

As a result of taxonomic and nomenclatural changes incorporated into the 7th edition of the *Check-list of North American birds*, as amended (AOU 1998, 1999, and 2000), we propose adding 11 more newly recognized species (Arizona Woodpecker, Bicknell's Thrush, Bullock's Oriole, Cassin's Vireo, Gilded Flicker, Plumbeous Vireo, Island Scrub-Jay, Juniper Titmouse, Nelson's Sharp-tailed Sparrow, Spotted Towhee, and Western Scrub-Jay). These birds were formerly covered by the MBTA as subspecies of other species.

We also propose to revise the common (English) or scientific names of an additional 57 species previously listed in 50 CFR 10.13. The proposal to shorten the English name of the Common Pauraque (*Nyctidromus albicollis*) to Pauraque is no longer necessary due to a name change adopted by the AOU (2000).

### How Is the List of Migratory Birds Organized?

The species are listed in two formats to suit the needs of different segments of the public: alphabetically in Section 10.13(c)(1) and taxonomically in Section

10.13(c)(2). In the alphabetical listing, species will be listed by common (English) name groups, with the scientific name of each species following the English name. This format, which is similar to that used in modern telephone directories, will be most useful to members of the lay public. In the taxonomic listing, species will be listed in phylogenetic sequence by scientific name, with the English name following the scientific name. To help clarify species relationships, we will also list the higher level taxonomic categories of Order, Family, and Subfamily. This format, which follows the sequence adopted by the AOU (1998), will be most useful to ornithologists and other scientists.

#### **What Species Are Not Protected by the Migratory Bird Treaty Act?**

The U.S. Fish and Wildlife Service and our predecessors have interpreted the MBTA and the underlying treaties as applying only to species of natural (but not accidental or casual) occurrence in North America or United States territory outside North America, and not to non-native species. One of the reasons for this is that the MBTA and the treaties are silent regarding the inclusion of non-native species and none of the four treaties expressly lists any non-native species. The treaties list only species, families, or groups of birds containing members native to the United States.

An example is the fact that the treaty with Canada, in elaborating on a family that is large enough to include species not native to North America, references only those species or groups of species that are native to North America. Also, this treaty does not list any of the many groups of insectivorous birds that are native only to areas outside North America; rather, all of the groups of this type that are listed occur in North America. The later treaties also are consistent with this interpretation. The treaties with Japan and Russia actually list the species covered (as opposed to listing families or groups) and all of the species exist naturally in United States territory.

This interpretation is also based on the overall purposes and goals of the treaties, which are to protect birds from extinction, protect their value as a food supply, and protect agricultural interests and forests from pests controlled by birds. If the MBTA were applied to protect introduced non-native birds it would likely not further any of these goals. Moreover, it would promote competition with native species for resources needed for survival.

A species is not protected by the MBTA if it falls into one or more of the following categories:

(1) Species intentionally or unintentionally introduced into the United States, even those that belong to a family or group covered by the Canadian or Mexican treaties. Examples include Mute Swan (*Cygnus olor*), a member of the family Anatidae, and Rock Dove (*Columba livia*), a member of the family Columbidae.

(2) Species that may have been sighted but are of purely accidental occurrence in the United States, unless either the Japanese or Russian treaty (both of which list birds by individual species) specifically includes it. Examples include Green Sandpiper and Japanese Turtle-Dove.

(3) Members of families or groups not specified by the Canadian or Mexican treaties. Examples include species in the families Phasianidae (grouse and turkeys), Odontophoridae (quail), Psittacidae (parrots), Todidae (todies), Meliphagidae (honeyeaters), Monarchidae (monarchs), Timaliidae (wrentits), and Coerebidae (bananaquits); and the subfamily Drepanidinae (Hawaiian honeycreepers).

#### **Does the Proposed Rule Comply With NEPA?**

This regulation is categorically excluded from further National Environmental Policy Act requirements under Part 516 of the Department Manual, Chapter 2, Appendix 1.10.

#### **Does the Proposed Rule Comply With the Endangered Species Act?**

Yes. A number of species appearing on the List of Migratory Birds are also designated as endangered or threatened under provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531, *et seq.*; see 50 CFR 17.11). No legal complications arise from the dual listing since the two lists are developed under separate authorities and for different purposes.

#### **What About Other Required Determinations?**

Because the proposed revision to the List of Migratory Birds will merely re-describe the birds already protected by Federal treaties with Canada, Japan, Mexico, and Russia, we determined that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This document has not been reviewed by the Office of Management and Budget under Executive Order 12866. In

accordance with the criteria in Executive Order 12866, this proposed rule is not a significant regulatory action.

This proposed rule is not a major rule under the terms of 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act.

The proposed rule does not contain information collection requirements that must be approved by the Office of Management and Budget under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

We find and certify, in compliance with the requirements of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1502 *et seq.*), that the proposed rule is not a significant regulatory action and will not impose a cost of \$100 million or more in any given year on local or State government or private entities.

As noted above, the proposed rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment under Executive Order 13132.

We have determined that these regulations will meet the applicable standards provided in sections 3(a) and 3(b)(2) of Executive Order 12988 for civil justice reform.

This rule will not have significant takings implications for private property, as defined in Executive Order 12630. A takings implication assessment is not required because migratory birds are a Federally managed resource under laws implementing international treaties and are not personal property.

Regarding Government-to-Government relationships with Tribes (59 FR 22951) and Executive Order 13175, the proposed revisions to existing regulations are purely administrative in nature. They will have no effect on Federally recognized Tribes or Tribal trust resources.

#### **Public Comments Invited**

We invite interested parties to submit written comments, suggestions, or objections regarding this proposal to one of the locations identified in the **ADDRESSES** section above. Following review and consideration of the comments, we will issue a final rule on these proposed amendments to the List of Migratory Birds.

Exports, Fish, Imports, Law enforcement, Plants, Transportation, Wildlife.

**Regulation Promulgation**

For the reasons discussed in the preamble, we propose to amend title 50, chapter I, subchapter B, part 10 of the Code of Federal Regulations, as follows:

**PART 10—[PROPOSED]**

1. The authority citation for part 10 continues to read as follows:

**Authority:** 18 U.S.C. 42; 16 U.S.C. 703–712; 16 U.S.C. 668a–d; 19 U.S.C. 1202; 16 U.S.C. 1531–1543; 16 U.S.C. 1361–1384, 1401–1407; 16 U.S.C. 742a–742j–l; 16 U.S.C. 3371–3378.

2. Revise Section 10.13 to read as follows:

**§ 10.13 List of Migratory Birds.**

(a) *What is the legal authority for this list?* The Migratory Bird Treaty Act (MBTA) in 16 U.S.C. 703–711, the Fish and Wildlife Improvement Act of 1978, 16 U.S.C. 712, and 16 U.S.C. 742a–j. The MBTA implements treaties between the United States and four neighboring countries for the protection of migratory birds, as follows:

(1) Canada: Convention for the Protection of Migratory Birds, August 16, 1916, United States-Great Britain (on behalf of Canada), 39 Stat. 1702, T.S. No. 628;

(2) Mexico: Convention for the Protection of Migratory Birds and Game Mammals, February 7, 1936, United States-United Mexican States (=Mexico), 50 Stat. 1311, T.S. No. 912;

(3) Japan: Convention for the Protection of Migratory Birds and Birds in Danger of Extinction, and Their Environment, March 4, 1972, United States-Japan, 25 U.S.T., 3329 T.I.A.S. No. 7990; and

(4) Russia: Convention for the Conservation of Migratory Birds and Their Environment, United States-Union of Soviet Socialist Republics (=Russia), November 26, 1976, 92 Stat. 3110, T.I.A.S. 9073, 16 U.S.C. 703, 712.

(b) *What is the purpose of this list?* The purpose is to inform the public of the species protected by regulations designed to enforce the terms of the MBTA. These regulations are found in Parts 10, 20, and 21 of this Chapter. We regulate most aspects of the taking, possession, transportation, sale, purchase, barter, exportation, and importation of migratory birds.

(c) *What species are protected as migratory birds?* The species are listed in two formats to suit the varying needs of the user: alphabetically in paragraph

(c)(1) of this section and taxonomically in section (c)(2). Taxonomy and nomenclature follow the 7th (1998) edition of the American Ornithologists' Union's *Check-list of North American birds*, as amended. Species not listed here, and therefore not protected by the MBTA, include any species introduced in the United States or any of its territory by humans, regardless of whether the introduction was intentional or unintentional. Also generally not listed and thus not protected are species of purely accidental or casual occurrence in the United States or its territory unless it is a particular species specifically referenced in a treaty. A species of accidental or casual occurrence is one whose the normal range is far enough removed from the United States as to make regular occurrence unlikely or "improbable" (The A.O.U. Check-list of North American birds, 6th edition, 1983:xxv).
