

Table 1. Number of nest boxes erected each year in Anchorage, Eagle River, and the Mat-Su Valley for study of Black-capped Chickadees, Boreal Chickadees, and Red-breasted Nuthatches in south-central Alaska.

Year	Anchorage	Eagle River/Mat-Su Valley	Total
<2000	9	0	9
2000	248	45	293
2001	11	162	173
2002	3	0	3
2003	16	0	16
2004	2	0	2
Total	289	207	496

Table 2. Source of sunflower seeds submitted for contaminants screening. The most commonly used retail outlets supplying bird seed were selected from various areas in Anchorage and the Mat-Su Valley. All six residences sampled had large numbers of chickadees coming to feeders regularly during winter. The first four had each reported several chickadees with deformed beaks; the latter two had not observed any deformities before testing began.

Source	Location	Supplier	Year purchased

Table 3. List of organochlorine (OC) pesticides, polychlorinated biphenyls (PCBs), organophosphate (OP) pesticides, carbamates, and elements for which 18 samples of sunflower seeds were screened.

OC pesticides	PCBs	OP pesticides	Carbamates	Elements
<i>o,p'</i> -DDD	Aroclor 1242	acephate	aldicarb	aluminum
<i>o,p'</i> -DDE	Aroclor 1248	azinphos-methyl	carbaryl	arsenic
<i>o,p'</i> -DDT	Aroclor 1254	chlorpyrifos	carbofuran	barium
<i>p,p'</i> -DDD	Aroclor 1260	coumaphos	methiocarb	beryllium
<i>p,p'</i> -DDE	Total PCBs	demeton	methonyl	boron
<i>p,p'</i> -DDT		diazinon	oxamyl	cadmium
HCB		dichlorvos		chromium
$\alpha$ -HCH		dichrotophos		copper
$\gamma$ -HCH (Lindane)		dimethoate		iron
dieldrin		disulfoton		lead
endrin		EPN		magnesium
heptachlor epoxide		ethoprop		manganese
$\alpha$ -chlordane		famphur		mercury
$\gamma$ -chlordane		fensulfothion		molybdenum
oxychlordane		fenthion		nickel
<i>trans</i> -nonachlor		malathion		selenium
toxaphene		methamidophos		strontium
mirex		methyl parathion		vanadium
		mevinphos		zinc
		monocrotophos		
		parathion		
		phorate		
		terbufos		
		trichlorfon		

Table 4. Number of reports received of Black-capped Chickadees with beak deformities observed at different locations in North America between November 1991 and May 2005. The minimum number of individuals excludes known or probable replicate sightings of individual birds during multiple years at the same locations.

Location	Number of reports	Minimum number of individuals
Alaska	2,153	1,441
Other states	17	13
Canada	4	4
Total	2,174	1,458

Table 5. Estimated minimum number of individual birds by species reported with beak deformities from Alaska between 1979 and 2005. These exclude probable resightings of the same individual birds, based on locations of the birds and descriptions of the deformities.

Species	Scientific name	Years reported	Number of individuals
Cackling Goose	<i>Branta hutchinsii</i>	1991	2
Pelagic Cormorant	<i>Phalacrocorax pelagicus</i>	2001–2003	3
Bald Eagle	<i>Haliaeetus leucocephalus</i>	2000	1
Peregrine Falcon	<i>Falco peregrinus</i>	2000	1
Downy Woodpecker	<i>Picoides pubescens</i>	1979–2005	24
Hairy Woodpecker	<i>Picoides villosus</i>	1999–2003	9
Gray Jay	<i>Perisoreus canadensis</i>	2000–2001	2
Steller's Jay	<i>Cyanocitta stelleri</i>	1997–2004	24
Black-billed Magpie	<i>Pica hudsonia</i>	1997–2005	35
Northwestern Crow	<i>Corvus caurinus</i>	1979–2005	44
Common Raven	<i>Corvus corax</i>	1992–2004	3
Black-capped Chickadee	<i>Poecile atricapillus</i>	1991–2005	1,441
Chestnut-backed Chickadee	<i>Poecile rufescens</i>	Unknown	1
Boreal Chickadee	<i>Poecile hudsonica</i>	1994–2002	5
Red-breasted Nuthatch	<i>Sitta canadensis</i>	1998–2005	29
Ruby-crowned Kinglet	<i>Regulus calendula</i>	1999	2
American Robin	<i>Turdus migratorius</i>	1999–2000	2
Varied Thrush	<i>Ixoreus naevius</i>	2001	1
Orange-crowned Warbler	<i>Vermivora celata</i>	2002–2004	2
Yellow-rumped Warbler	<i>Dendroica coronata</i>	1998–2004	2
American Tree Sparrow	<i>Spizella arborea</i>	2002	1
Savannah Sparrow	<i>Passerculus sandwichensis</i>	1999	1
Lincoln's Sparrow	<i>Melospiza lincolni</i>	2002	1
Dark-eyed Junco	<i>Junco hyemalis</i>	2002	1
Pine Grosbeak	<i>Pinicola enucleator</i>	1999–2002	4
White-winged Crossbill	<i>Loxia leucoptera</i>	2002	1
Common Redpoll	<i>Carduelis flammea</i>	1999–2002	5
Pine Siskin	<i>Carduelis pinus</i>	1999–2002	3

Table 6. Beak measurements of normal and deformed Black-capped and Boreal chickadees and Red-breasted Nuthatches captured in the Anchorage and Mat-Su Valley region, Alaska, 1998–2005. For individuals recaptured multiple times during study, only those from first capture were included in calculations. Birds captured as both normal and deformed were included once each time.

Species	Measurement <sup>a</sup>	Sex	Normal					Deformed				
			N	Mean	SE	Min	Max	N	Mean	SE	Min	Max
Black-capped Chickadee	Nares to tip	M	827	7.29	0.01	6.0	8.4	81	11.56	0.55	5.9	31.6

Total	128	131	46	13	42	1	1	5	4	25	23	1

<sup>a</sup>NW=North and West Anchorage; S=South Anchorage; ER/MS=Eagle River and Mat-Su Valley.

Table 8. Number of nest boxes in south-central Alaska that were occupied by chickadees with deformed beaks, 2000–2004. No deformed Red-breasted Nuthatches nested in any of the boxes.

Extent of deformity	Black-capped Chickadee		Boreal Chickadee
	Male	Female	Female
Severe	4	9 <sup>a</sup>	0
Moderate	8 <sup>a</sup>	13	0
Possible incipient	5	16	2
Total	17	38	2

<sup>a</sup>In one pair the male had a moderate beak deformity and the female was severely deformed.

Table 9. Comparison of clutch and brood sizes of Black-capped Chickadees relative to presence or absence of beak deformity in parents in south-central Alaska, 2000–2004.

Parameter/Parental status	<i>n</i>	Mean $\pm$ SE	Minimum	Maximum
Clutch size				
Normal parents	216	7.83 $\pm$ 0.08	2	11
Deformed female	30	8.13 $\pm$ 0.18	6	10
Deformed male	15	8.47 $\pm$ 0.27	7	11
Brood size at hatch				
Normal parents	220	7.15 $\pm$ 0.12	1	10
Deformed female	14	6.14 $\pm$ 0.51	2	10
Deformed male	10	7.00 $\pm$ 0.42	5	9
Brood size at 12 days old				
Normal parents	207	6.74 $\pm$ 0.13	2	10
Deformed female	13	5.85 $\pm$ 0.58	2	10
Deformed male	8	6.13 $\pm$ 0.35	5	8

Table 10. Model selection for clutch size ( $n = 260$ ) of Black-capped Chickadee nests from 2000–2004 in south-central Alaska. Models with the lowest  $\Delta\text{AIC}$  and the greatest Akaike weights ( $w_i$ ) have the most support.  $K$  is the number of parameters in each model, including the intercept and explanatory variables. Areas include NW and S Anchorage and Eagle River/Mat-Su Valley. Deformity indicates adult male (M) or female (F) with beak deformity. Date is clutch initiation date.

Model	$K$	$\Delta\text{AIC}$	$w_i$

<sup>a</sup>Range of DLs for compounds that were not detected in some of the samples.

<sup>b</sup>Congeners coeluted.

Table 26. Concentrations (ng/g wet weight) of polychlorinated dibenzo-*p*-dioxin (PCDD) and polychlorinated dibenzofuran (PCDF) congeners in tissues of adult Black-capped Chickadees from Anchorage and Mat-Su Valley, Alaska, in 2001–2002. Frequency of detection is indicated by the number of samples above the detection limit (DL), which varied among samples for a given compound.

Analyte	<i>n</i>	# above DL	Concentration	
			Minimum <sup>a</sup>	Maximum
2,3,7,8-TCDD	16	0	<0.00182–0.00229	
1,2,3,7,8-PeCDD	16	0	<0.00911–0.01144

OCDF	16	0	<0.01820–0.02288	

<sup>a</sup>Range of DLs for compounds that were not detected in some or any of the samples.

Table 27. Concentrations (ng/g wet weight) of polychlorinated dibenzo-*p*-dioxin (PCDD) and polychlorinated dibenzofuran (PCDF) congeners in tissues of nestling Black-capped Chickadees from Anchorage and Mat-Su Valley, Alaska, from 2000–2001. Frequency of detection is indicated by the number of samples above the detection limit (DL), which varied among samples for a given compound. Cl-4 through Cl-7 are concentrations of all PCDDs or PCDFs with 4–7 chlorine atoms, respectively.
