

Docket #00D-1598, 00N-1396

Feb, 7

2000

Dear FDA Commissioner,

I don't understand why you think it is all right for me and my family to eat genetically engineered foods that Europe, Japan and other nations won't allow into their countries.

Please, protect the public health by taking all GMO products off the market until they have been proven safe. We need labeling of any foods that are on the market. I need a choice!

Sincerely, Maria Gillen
