

Docket #00D-1598, OON 1396 02/08/01

As consumers the American public deserves to know the truth about the ~~foods~~/pesticides/additives etc that go into our food supply — that goes in spades regarding genetically modified products — no one knows for sure what short & long-term negative effects these foods might have. Do we want another DDT/Alar etc debacle ?? I sure hope not — check these things out BEFORE succumbing to the interests of agribusiness.
