To whom It may concern:

The new FDA Policy fails to require testing or labeling of Genetically Engineered Food. I'm referring to Docket # OON-1396. Safe food for people matters and for that reason I favor a properly regulated control of this "out-of-control" technology. This can be done by instituting pre-market safety testing to demonstrate that GE Foods and crops are safe. Furthermore, pre-market testing needs a long-term research period. People matter.
