

Dear Commissioner:

2/11/01

I support BIOTECH.

GM foods are the best hope of the poor. Without a flourishing biotech industry, the poor of this world will continue to be ill fed and poorly housed.

So I oppose mandatory labeling of GM foods. In fact I even oppose voluntary labeling because I am afraid that people would be frightened of GM foods. So docket # 00D-1598 and 00N-1386 are too severe. The FDA should do all it can to promote biotech. Yours truly,
Kevin Cahill

00D-1598
