Dear FDA, RE Docket # 00D-1598

I am writing to urge you to institute a MANDATORY Labelling policy for Genetically Modified Foods. We live in a free market system - We should be educated about what is in our food / or what our food is made from and be allowed to choose. A label would serve this purpose. In fact, it is very suspicious that the producers of genetically modified foods are so unwilling to label their products. Why? The Government is unfairly protecting this GMO thing against the will of the majority of Americans
