

Dear Commission,

12/6/81

Please support of a legal petition by the Center for Food Safety to see that no new genetically-engineered foods or products be released until the FDA requires long-term safety testing of all GE foods before they go to market.

2. To see that all GE foods presently on the market be labeled, giving consumers the right to know what is in the food they are eating.

Sincerely,  
Margaret P. Morrison
