RE: Notification of Nutritional Support Statements

Dear Sir or Madam:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of K-Mag Aspartate™ a dietary supplement. Source Naturals® is the manufacturer of K-Mag Aspartate™.

Statements being made in the labeling of K-Mag Aspartate™:

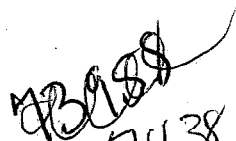

- (1) Source Naturals uses high quality, fully-reacted potassium and magnesium aspartate hydrochlorides. Potassium is essential for nerve function, muscle strength, and glycogen formation, among other functions. Magnesium plays a key role in over 300 enzymatic reaction, including those involved in the Krebs cycle (one of the body's main energy production processes), the relaxation of muscle tissue, neurotransmitter activity and hormone regulation. L-Aspartic acid also plays a vital role in energy production and is a major excitatory neurotransmitter. This makes K-Mag Aspartate™ an excellent source of energizing nutrition for athletic activity or fast-paced daily living.

To the best of my knowledge, and based upon information and belief present at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals possesses substantiation that the statements are truthful and not misleading.

Ira L. Goldberg
President, Source Naturals, Inc.
