RE: Notification of Nutritional Support Statements

Dear Sir or Madam:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of Glutathione Sublingual Complex, a dietary supplement. Source Naturals® is the manufacturer of Glutathione Sublingual Complex.

Statements being made in the labeling of Glutathione Sublingual Complex:

(1) Glutathione Sublingual Complex contains glutathione (GSH), a key element of the livers detoxifying process, and also the precursor for glutathione peroxidase, a major free radical-scavenging enzyme. Recent scientific research indicates that molybdenum, a trace mineral that activates the enzymes aldehyde oxidase and sulfite oxidase, may provide necessary nutritional support for chemically sensitive individuals.

(2) The sublingual form is absorbed directly into the bloodstream, via the blood vessels under the tongue and in the cheeks, allowing for quick entry into the system.

To the best of my knowledge, and based upon information and belief present at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals possesses substantiation that the statements are truthful and not misleading.

Ira L. Goldberg
President, Source Naturals, Inc.
