

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #OOP-121\CPI

All GE foods should be labeled so I am informed and have a choice.

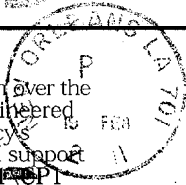

GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

with the generous amounts of nutrients naturally found in fruits and vegetables, genetically enhanced food is completely unnecessary if using genetic engineering.
