

Dear Secretary Shalala,

Yes, it's another "crank" note, hoping beyond hope to somehow get through. God knows, you must know about all of this. So why doesn't something happen? You and the FDA are supposed to make something happen. Health and Human services (cap HHS). That's why your job exists. Knowing that you know about all of this, what can you be thinking, to allow it all to continue?

Please, oh please enlighten this more-than-alarmed taxpayer.

Most sincerely,

Bern Berg
