RE: dockets OON-13496 & OOD-1598  
MAR 19 10 03

Dear Jane Henney

I am outraged that the FDA continues to ignore the safety concerns of consumers, doctors and scientists, in favor of protecting the economic interests of biotech companies. I would sure hope that the FDA change its policy to require and pre-market safety testing of all genetically engineered foods.

Sincerely,

Agnes Wyatt
