

March 7, 01

Dear FDA Commissioner,
5510 S. VINE ST., P4:19

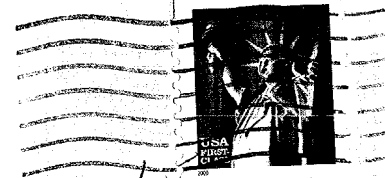

It is only sensible that if foods and drugs are tested, all genetically engineered ingredients should and must be tested before using them on the general human population.

These "GEI's" must be tested before human usage, and once tested, they must be labeled properly so people like my family and friends are able to identify them in order not to use them.

Sincerely,
Diana M. Keltzorne
