Re: FOIA Request S9100110: Victor Automotive Products / Samples 9-830-3080/3201/3202/3203/3204 / Field File

Dear Mr. Fry:

Thank you for your Freedom of Information Act (FOIA) request seeking information from the Commission. The records from the Commission files responsive to your request have been processed and copies of the releasable responsive records are enclosed. The enclosed records include file information generated by the Commission itself or its contractors for regulatory or enforcement purposes. These records are identified as memoranda and other correspondence, notes and documents. The Commission has established management systems under which supervisors are responsible for reviewing the work of their employees or contractors. The file information materials are final and have been prepared and accepted by the Commission's staff under such review systems. The Commission believes that it has taken reasonable steps to assure the accuracy of the information.

We must withhold from disclosure other records responsive to your request that are contained in the Commission's law enforcement investigatory file pursuant to the FOIA Exemptions 3, and 4, 5 U.S.C. §§ 552(b)(3), and (b)(4), and sections 6(a)(2), and 6(b)(1) of the Consumer Product Safety Act (CPSA), 15 U.S.C. §§ 2055(a)(2), and 6(b)(1).

FOIA Exemption 3 provides for the withholding from disclosure of matters that are specifically exempted from disclosure by another statute. The files contain proprietary and confidential information that we must withhold pursuant to Exemptions 3 and 4 and section 6(a)(2) of the CPSA. Section 6(a)(2) prohibits the Commission from disclosing information that is exempt from disclosure under Exemption 4 of the FOIA. That exemption protects trade secrets and confidential commercial information directly related to a firm's business that the firm

has not made public and whose disclosure could give a substantial commercial advantage to a competitor. Specifically, we are withholding: confidential financial information from portions of pages 12 and 14; supplier and formulation information from portions of pages 17, 18, 19, 20, 21, 22, and entire pages 71, 80, 86, 91, 111, 135, 144, 152, 159, and 161; and sales figures from portions of page 20.

We are also relying in part to section 6(b)(1) of the CPSA to withhold an unconfirmed reported incident from entire pages 172-183. Section 6(b)(1) of the CPSA prohibits the Commission from disclosing information about a consumer product that identifies a manufacturer or private labeler unless the Commission has taken "reasonable steps" to assure that the information is accurate, that disclosure is fair in the circumstances, and that disclosure will be reasonably related to effectuating the purposes of the laws that the Commission administers. See Commission regulation, 16 C.F.R. § 1101.32. The Commission's policy is to withhold each consumer complaint and reported incident unless: (1) the Commission has conducted an investigation of the complaint and reported incident, and the investigation corroborates the substance of the complaint and reported incident; (2) the Commission has conducted or obtained a technical, scientific, or other evaluation of the product that is the subject of the complaint and reported incident, and evaluation corroborates the substance of the information contained in the complaint and reported incident; or (3) the consumer or person reporting or submitting the incident confirms the accuracy of the information. The Commission did not take any of these steps with regard to this certain consumer complaint and reported incident at pages 172-183.

According to the Commission's regulations implementing the FOIA at 16 C.F.R. § 1015.7, a partial denial of access to records may be appealed to the General Counsel of the Commission within thirty (30) days of your receipt of this letter. An appeal must be in writing and addressed to: FOIA APPEAL, General Counsel, ATTN: Office of the Secretary, U.S. Consumer Product Safety Commission, Washington, D.C. 20207.

Processing this request, performing the file searches and preparing the information, cost the Commission \$90.00. In this instance, we have decided to waive all of the charges.

Sincerely,

Todd A. Stevenson

RE: Five Automotive Products
CPSC Samples 97-830-3080/3201/3202/3203/3204

Dear Mr. Braverman:

The U.S. Consumer Product Safety Commission (CPSC) analyzed samples five automotive products repackaged and distributed by your firm. The analyses show that these five products are misbranded hazardous substances, and distribution of these products is prohibited. The Commission staff has no objection to your company depleting its remaining inventory of these products. The staff requests that the labeling be corrected on future production.

The products in question are Victor V-500 Pressurized Lock De-Icer, sample 97-830-3080, Victor V-502 Pressurized Lock De-Icer, sample 97-830-3201, Victor VB-58 Bicycle Tire Emergency Repair, sample 97-830-3202, Victor V-301 Vinyl Adhesive, sample 97-830-3203, and Victor Rubber Cement 3/8 oz., sample 97-830-3204. Samples of these products were collected by a Commission investigator during an inspection of your company.

The samples were evaluated for compliance with the labeling requirements of the Federal Hazardous Substances Act (FHSA). For your reference, copies of the laboratory reports, the FHSA regulations, Part 1500 to 1512, and a Compilation of Statutes Administered by CPSC, which contains the FHSA, are enclosed.

Examination of the five products found that they are not in compliance with the FHSA regulations.

VICTOR V-500 AND V-502 PRESSURIZED LOCK DE-ICER

The Material Safety Data Sheet (MSDS) for these products does not list isopropyl alcohol as a component although isopropyl alcohol is listed on the containers as a component. The MSDS indicates that this product may be a skin irritant. The labels do not have the signal word and statements of hazard placed before the other cautionary information. These products appear to require the following minimum warnings:

WARNING - FLAMMABLE CONTENTS UNDER PRESSURE IRRITANT
Contains aliphatic hydrocarbons and ethylene glycol Monobutyl Ether. Do not puncture or incinerate container. Do not use near heat or flame. Do not expose to heat or store at temperatures above 120°F.

Avoid contact with eyes or prolonged contact with skin. In case of contact flush skin or eyes thoroughly with water for 15 minutes. For eyes, get prompt medical attention.

Keep out of the reach of children.

These statements may remain in a vertical position on the container per 16 C.F.R. Part 1500.121(b)(1) for cylindrical containers with a narrow diameter. These warning statements "WARNING-FLAMMABLE CONTENTS UNDER PRESSURE IRRITANT" and a statement to see other cautions on the back panel should be placed on the front of the blister card. Although the containers are visible through the display window of the card, the containers can turn making the statement to be unable to be read.

VICTOR VB-58 BICYCLE TIRE EMERGENCY REPAIR

The MSDS for this product lists the hazardous components as perclene and chlorodifluoromethane. Perclene is a name for perchloroethylene. This product appears to require the following minimum warning:

(FRONT PANEL LABELING)

**DANGER: EXTREMELY FLAMMABLE
VAPOR HARMFUL CONTENTS UNDER
PRESSURE.**
See other cautions on back
panel.

Michael Braverman
February 4, 1997
Page Three

(BACK PANEL LABELING)

Contains perchloroethylene.
Use only in a well ventilated area. Avoid prolonged breathing of vapor or contact with skin.
Do not puncture or incinerate container.
Do not expose to heat or store at temperatures above 120°F.
Keep out of the reach of children.

The statement "DANGER - EXTREMELY FLAMMABLE VAPOR HARMFUL CONTENTS UNDER PRESSURE See other cautions on back panel" should be placed on the front of the blister card. Again, the containers are visible through the display window of the card but the containers may turn making the statements unable to be read.

VICTOR V-103 VINYL ADHESIVE

The MSDS for this product lists the hazardous ingredients as 19-20% synthetic resins, 48-50% acetone, 28-30% methyl ethyl ketone, and 3-4% cyclohexanone. The MSDS lists a flash point of -40°F. This product appears to require the following minimum warnings:

FRONT: DANGER - EXTREMELY FLAMMABLE
INJURIOUS TO EYES
See cautions on back panel.

BACK: Contains acetone, methyl ethyl ketone, and synthetic resins.
Do not store or use near heat, sparks, or flame.
Use only in a well ventilated area.
Avoid contact with eyes and prolonged contact on the skin.
In case of eye contact, flush with water for 15 minutes.
Get medical attention.
Keep out of the reach of children.

Michael Braverman
February 4, 1997
Page Four

These statements are required to be as close to the dispensing end of the tube as possible by 16 C.F.R. Part 1500.121(e), and not at the bottom of the tube as they currently are.

VICTOR RUBBER CEMENT 3/8 OZ

The MSDS for this product lists the hazardous components as 92% Heptane and 1% ethyl alcohol and a flash point of 250°F. This product appears to require the following minimum warnings.

FRONT: WARNING-FLAMMABLE
 See other cautions on back panel.

BACK: Contains heptane.
 Do not use near heat or flame.
 Keep out of the reach of children.

As with the vinyl adhesive label, these statements are required to be as close to the dispensing end of the tube as possible.

The minimum type size to be used on these labels depend on the size of the containers principal display panel. Please refer to 16 C.F.R. Part 1500.121. This section lists the prominence, placement, and conspicuousness requirements as well as required type sizes.

Distribution, sale, or importation of a misbranded hazardous substance is prohibited under section 4 of the FHSA. As a result of these violations, you could be subject to fines of up to \$1.5 million and/or imprisonment for not more than one year, or both. Please review Chapter 1 of the enclosed Regulated Products Handbook (Handbook) for details of the penalties.

Although the Commission staff does not object to your company depleting your remaining inventory of these five products within a reasonable time frame, the staff requests the labeling be corrected on future production.

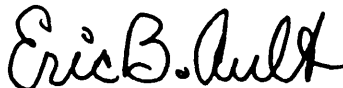

Michael Braverman
February 4, 1997
Page Five

Sections 15 and 37 of the CPSA contain requirements for reporting to the Commission information on certain products you manufacture, import, or distribute. Chapter 4 of the Handbook describes the reporting requirements applicable to your firm. To assure you of the confidential treatment of information you submit, please review Chapter 7 of the Handbook.

Please respond in writing within 10 days from the date you receive this letter, outlining the specific corrective actions you plan to take to address the hazard associated with these products. Please direct your response to Robert B. Johnston, Compliance Officer, at the address and telephone number above.

We appreciate your cooperation.

Sincerely,

Eric B. Ault
Director

Lying about logo is a legal no-no

BY CAM SIMPSON
FEDERAL COURT REPORTER

Some people think "Made in America" is a meaningless label in today's global economy. Those people have never heard of Michael Braverman.

The Des Plaines corporate chief faces up to six months

in prison after being convicted of an obscure federal crime that forbids people from removing labels showing where foreign products are made and replacing them with "Made in the U.S.A." logos.

Employees at Braverman's company, Victor

Turn to next page

Label

Continued from previous page

Automotive Inc., were told to remove made-in-Taiwan labels from 420,000 tire-pressure gauges; they replaced them with "Made in the U.S.A." labels, put them in packages that also said "Made in the U.S.A.," and shipped them to Kmart for resale, according to court records.

Prosecutors believe Braverman is the first person here to be convicted for violating the almost 70-year-old statute. Only one person nationwide was convicted of the crime last year, according to Justice Department records analyzed by TRAC, a Syracuse University data bank.

"This is the kind of thing that should have been handled administratively, not criminally," said attorney Robert Breisblatt, who is representing Braverman and Victor. The company and its chief both pleaded guilty late last month to violating the Tariff Act of 1930. "This is fraud," said Bill Anthony of the U.S. Customs Service in Washington. "There are many reasons why consumers want made-in-the-U.S.A. goods."

Braverman will be sentenced Oct. 14. He faces a fine of \$40,000 and up to six months in prison. Separately, his company, which employs about 150 people at its Des Plaines facility, has agreed to pay \$80,000.

Braverman's company sells auto accessories to retailers.

His troubles began in late 1993 when he entered into a national contract with Kmart, according to court records. He promised he would stock Kmart stores nationwide with

tire-pressure gauges sold under the "Monkey Grip" trademark. And he specifically promised, in writing, that they'd be made in the United States.

Unable to locate cheap gauges domestically, Braverman ordered thousands from Taiwan. The Taiwanese label was engraved on a pocket clip slipped around each gauge. Braverman had his employees slip off the clips and replace them with ones sporting the American-made designation, he admitted in court.

U.S. Customs agents raided Victor in late 1994 and found 37,000 tire gauges in U.S.A. packages. They said 420,000 had already been shipped. The gauges retailed for about \$1.99 apiece, said Assistant U.S. Attorney Daniel Parish.

"My clients have clearly recognized that what they did was wrong, and it was an isolated incident," Breisblatt said.

Breisblatt said the gauges were recalled. He also said Kmart remains a Victor customer.

The federal statute that Braverman ran afoul of has been enforced sparingly with criminal charges since it went into effect.

James Didia, a Seattle shopkeeper, was convicted in the 1930s for having employees remove "Made in Japan" labels from at least 639 products in his store.

Bernard Mersky, a musical instrument dealer, was charged in New York in the 1950s for removing violin labels that said made in "Soviet-Occupied Germany" and replacing them with "Made in Germany" labels. A judge tossed out the case.

In Pittsburgh in 1989, 10 executives were named in a 30-count indictment because their company allegedly removed foreign labels from rubber hoses.

Mr. Robert B. Johnson
U.S. Consumer Products Safety Commission
Central Regional Center
230 S. Dearborn Street-Suite 2944
Chicago, Illinois 60604

Dear Mr. Johnson:

We are in receipt of correspondence dated February 4, 1997, regarding the Consumer Product Safety Commission findings of non-compliance of five Victor Automotive Products.

After reviewing the findings from Mr. Ault, it is our intention to fully comply and implement the requisite changes in compliance with the FHSA regulations. The following corrective actions have been taken immediately and will be implemented for all future productions:

- 1.) All packaging design and suppliers have been notified and are making the necessary labelling changes as required on both blister card and tubes.
- 2.) All production orders for these items are on hold until revisions have been included into the production.
- 3.) All proofs and chromolins will be forwarded to your attention for review and approval. Proofs should be made available in approximately 45 to 60 days.

We are appreciative of the Commission staff's decision allowing Victor to deplete its remaining inventory.

Should you have any questions please contact Pete Calhoun or the undersigned at your convenience.

Sincerely,

Michael Braverman
President
Victor Products Inc.

EIR 12/4/96 DRB

Victor Automotive Products
Des Plaines, IL. 60016

ENDORSEMENT CONTINUED:

During this inspection 5 of the firm's products were reviewed and found to have potential FHSA labeling violations. This included the firm's "LOCK DE-ICER" which initiated this inspection. Samples of all 5 products were collected and sent to LSHL.

F/U: REFER TO COMPLIANCE.

37

EIR 12/04/96

1

Victor Automotive Products
501 S. Wolf Road
Des Plaines, IL. 60016

SUMMARY OF FINDINGS:

This inspection of Victor Automotive Products, Inc. was conducted on 12/04/96 as a follow up to surveillance conducted by a Kansas City Investigator on 8/14/96 at a local Ace Hardware Store; that surveillance determined that a lock de-icer product distributed by Victor Automotive did not have warning labeling required by the Federal Hazardous Substances Act.

A review of the firm's model #V-500 and model #V-502 lock de-icer products confirmed several labeling violations. A brief examination of the hundreds of automotive and bicycle repair products distributed by the firm was also made. Victor brand #V-301 vinyl adhesive, 3/8 ounce size tubed rubber cement, and Victor brand model #VB-58 bicycle tire aerosol repair products all were found to have multiple labeling violations.

The above products were collected as samples, 97-830-3080; 97-830-3201 thru 3204. The samples were sent to HSHL for chemical analysis as may be directed by FOCR Compliance.

This firm was last inspected on 5/23/88, and many of the identical labeling violations were noted during that inspection. Please refer to that inspection report for additional detail.

PERSONS INTERVIEWED:

Credentials were shown and a Notice of Inspection issued to Ms. Toni Ciccone, Office Manager, during the unannounced inspection visit conducted on 12/04/96. All information contained in this report was obtained from Ms. Ciccone or Peter Calhoun, Purchasing Manager and Henry Janus, Plant Supervisor. A copy of the Notice of Inspection is attached as Exhibit "A."

STRUCTURE AND TYPE OF BUSINESS;

14

The firm is a distributor of numerous automotive and bicycle repair products such as lock de-icer, tire patch kits, adhesives for various auto applications, first aid and emergency car kits, etc. These products are manufactured by outside vendors to Victor Automotive specifications, shipped to Victor Automotive Products for final (own label and private label) packaging, and then shipped to retailers nationwide.

A copy of the firm's product catalog depicting some of their many products is attached as Exhibit "B." A vendor (wholesale) price listing is included.

COMPLAINT FILES:

The Office Manager, Ms. Ciccone, has maintained a formal complaint file for the past twelve months; complaints were typically responded to and the associated paperwork discarded before that time. The complaint file was personally reviewed by this investigator. None of the approximately 20-25 complaints were of a safety or injury related nature. Most had to do with the customer not being satisfied with the performance of a product. There were several complaints suggesting that the firm's tire repair products either further damaged the tire or did not fix flats adequately.

Ms. Ciccone has worked at the firm for the past three years. She stated that she was unaware of the firm ever being involved in any type of civil liability action because of a defective product.

PRODUCT EXAMINATION AND DESIGN:

The company has a large display area in their offices, and Ms. Ciccone stated that most every product distributed by the firm is currently on display. Many of the products are tools, tire pressure gauges, and other items without chemical products, however a number of the items also use glues, adhesives, or other solvents which would require warning labeling. In a brief review, many of those products did appear to be properly labeled; however, the following items were selected as samples for a more detailed review.

1) **Victor brand model #V-500 pressurized lock de-icer:** this product is advertised as an automobile lock de-icer and lubricant. The aerosol tip is inserted in the lock and the main cartridge then pushed, expelling the container contents into the lock. Photographs of the packaged product and the actual container are attached as Exhibit "C."

Victor Automotive Products
501 S. Wolf Road
Des Plaines, IL. 60016

The contents are reportedly an isopropyl alcohol mixture manufactured by the Ashland Chemical Co., Columbus, OH. however this was not confirmed. The MSDS is attached as Exhibit "D." The container is actually filled by the Ultramotive Corporation, Bethel, VT.; an invoice showing Victor Automotive's purchase of a quantity of the filled de-icer units from the Ultramotive Corp. is attached as Exhibit "E." The filled containers are then individually labeled and put in the hang tag style packaging by Victor Automotive employees, and then distributed directly to retailers directly from the Des Plaines, IL. plant.

The container is 3" high and 7/8" diameter; the principle display panel is 2.7 inches. All labeling is printed vertically on the container. The principle display panel contains the brand name information "Victor pressurized V-500 Lock De-Icer" and is printed together with a subtitle "automatically thaws frozen locks. See precautions on back. Net wt. 5/8 oz. (18g)." If the container is then rotated 180 degrees, the warnings "Warning-Flammable. Contents under pressure. Do not use near heat or open flame. Avoid contact with eyes. In case of contact, flush thoroughly with water. If irritation persists, get medical attention. Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120 degrees. Keep out of reach of children." At another location on the container is the statement "contains isopropyl alcohol."

A number of violations of 16 CFR 1500.121 are apparent. First, the statement of principle hazard should be displayed on the principle display panel, not on the back. Second, this information must be displayed horizontal to the base of the container, yet all labeling is vertical. (Note: this size cylinder may be eligible for an exemption under 1500.121). Third, The product container itself can spin or turn within the bubble display window of the packaging, and the labeling on the container would thus be displayed randomly. For this reason, the statement of principle hazard must be displayed on the front of the display card, not on the back side of the hang card packaging as it is presently.

Twelve units of the model #V-500 de-icer were collected as sample #97-830-3080. The product also comes in a larger size, model #V-502. This model has the same labeling violations as the #V-500, so sample #97-830-3201 was collected of that model also.

2) **Victor brand model #VB-58 Bicycle Tire Emergency Repair:** this product is advertised as an aerosol product that "repairs tires instantly." Photographs of the packaged product and the actual container are attached as Exhibit "F."

16

The hazardous ingredients in this product are [REDACTED]

[REDACTED]

The container is 4 1/4" high and 2" in diameter; the principle display panel is 8.5 inches. The principle display panel contains the brand name information "Victor Bicycle Tire Emergency Repair" and is printed together with the subtitles "seals and inflates," and "repairs tires instantly." "Net wt. 4 oz. (113g)." The warning labeling on the front panel states "Danger. Extremely flammable. Contents under pressure. Read back panel carefully." The back panel has the warnings "Caution: Keep away from heat, sparks, and open flame. Do not puncture or burn container. Exposure to heat or prolonged exposure to sun may cause bursting. Do not expose to heat above 120 degrees F. Avoid prolonged contact with skin and breathing of vapor or spray mist. Do not take internally. Keep out of reach of children."

This investigator did not have adequate reference materials to determine whether the signal wording and first aid treatment cautions were adequate. The warning "do not take internally" may suggest that directions whether or not to induce vomiting may be missing.

A number of violations of 16 CFR 1500.121 are apparent on this product. First, the product container itself can turn within the bubble display window of the packaging, and the labeling on the can would thus be displayed randomly. For this reason, the statement of principle hazard must be displayed on the front of the display card itself. The statement of principle hazard is included on the front of the display card; however, due to the placement of the container in the packaging half of the wording is covered by the can and/or the bubble window and is not visible. Second, the statement of principle hazard type size is in 5/64" type, not the required 3/32" size type. Third, the rear panel cautions are in 3/64" type, not the required 1/16" size type.

Twelve units of the model #V-B-58 "Victor Bicycle Tire Emergency Repair" product were collected as sample #97-830-3202.

3) Victor brand model #V-301 vinyl adhesive: this product is

M

advertised as a vinyl adhesive that "repairs all leather or vinyl," and "for home or auto." Photographs of the packaged product and the actual container are attached as Exhibit "I."

The hazardous ingredients in this product a

The tube style container is 4 1/2" high and 1 1/8" wide; the principle display panel is 5.85 inches. The principle display panel contains the brand name information "Victor Vinyl Adhesive" and is printed together with the subtitles "for all vinyl and leather repairs." "Net wt. 1.5 oz." The warning labeling on the front display panel of the tube states "Danger. Extremely flammable. Harmful or fatal if swallowed. Vapors harmful. See back panel." The back panel has the warnings "Danger. Contains acetone and tetrahydrofuran. Do not use near heat, sparks, and open flame. Keep container closed when not in use. If swallowed, do not induce vomiting. Avoid prolonged breathing of vapors. Use with adequate ventilation. Avoid contact with skin or eyes. In case of eye contact, flush with plenty of water and call physician. Keep out of reach of children."

This investigator did not have adequate reference materials to determine whether the signal wording and first aid treatment cautions were adequate. Tetrahydrofuran typically requires a first aid direction to give 1 or 2 glasses of water and induce vomiting, yet the opposite is listed on the tube. Further evaluation will be necessary to determine which is correct, given the combination of hazardous ingredients in this product.

There are some clear violations of 16 CFR 1500.121 regarding this product. First, the signal word and principle statement of hazard on the product tube itself are all in 5/64" type size instead of the required 5/32" size type. Second, the display card has the statement "Caution: extremely flammable. See back panel." The appropriate signal word should be "Danger" instead of "Caution." The remainder of the statements of principle hazard listed on the tube should also be repeated on the display packaging card. Further, the signal word should be in 5/32" size type rather than the current 1/8" type size currently being used. Also the

EIR 12/04/96

6

Victor Automotive Products
501 S. Wolf Road
Des Plaines, IL. 60016

product is packaged in a collapsible metal tube and the warnings are not at the dispensing end as is required. Four units of the model #V-301 vinyl adhesive product were collected as sample #97-830-3203.

4) **Victor brand rubber cement:** 3/8 ounce size tube. This product is used in a number of the firm's Victor brand tire repair kits, including #'s V-56, V-101, V-402, V-103, V-104, V-106, V-107, V-108, V-410, V-414, V-417, V-418 and V-420. Please refer to the color brochure of these products in Exhibit "B" for further reference. Photographs of the actual product tube are attached as Exhibit "L."

The hazardous ingredients in this product

The tube style container is 2 1/4" high and 3/4" wide; the principle display panel is 1.7 inches. The principle display panel contains the brand name information "Victor Rubber Cement" and is printed together with the subtitle "for all rubber repairs." "3/8 fl. oz. (12ml)." The warning labeling on the front display panel of the tube states "Danger. Extremely flammable, harmful or fatal if swallowed, vapors harmful. See back panel." The back panel of the tube has usage directions and distributor identification information only; there are no further cautionary statements and no first aid information at all.

No reference materials suggesting the proper caution and first aid information for heptane was available to this investigator. The ingredient ethyl alcohol typically requires the signal word and principle statement of hazard "Warning- Flammable," with the additional caution statements "contains denatured alcohol. Do not use near heat or flame. Avoid contact with eyes. In case of eye contact, flush thoroughly with water. If irritation persists, get medical attention. Keep out of reach of children." None of this information was present on the tube itself, though it presumably might be listed on the hang card packaging of the various tire repair kits the rubber cement is placed inside. This was not confirmed. Also the warnings are not at the dispensing end of this collapsible metal tube as required.

(9)

EIR 12/04/96

7

Victor Automotive Products
501 S. Wolf Road
Des Plaines, IL. 60016

Four units of the Victor brand rubber cement, 3/8 ounce tube product were collected as sample #97-830-3204. Due to the large numbers of products containing this cement, the individual tube itself was selected for sampling rather than each model unit the cement is contained in.

The labeling design is done in-house by Victor Automotive personnel, in consultation with an outside artist. The personnel contacted during this inspection did not know when the labeling content for these sampled products was last reviewed. They were apparently unaware that several of these products had been found to contain many of the exact same labeling violations during a 5/23/88 inspection of the firm. Please refer to that inspection report for further detail. It is not known what compliance action was taken by the CPSC at that time.

SAMPLE DOCUMENTATION:

A sample collection receipt was issued to Ms. Ciccone for the samples collected; a copy of that receipt is attached as Exhibit "O." There was no charge for the samples. Ms. Ciccone also provided a number of invoices to show the sale of the sample products to out-of-state retailers; that information is attached in Exhibit "P." A brief affidavit obtained from Ms. Ciccone is attached as Exhibit "Q." Copies of the five sample collection reports, 97-830-3080 and 97-830-3201 thru 3204 are attached as Exhibit "R."

DISTRIBUTION:

Mr. Calhoun provided the following sales figures for the sampled products:

uted for

ed for

m
Sp

20

DISCUSSION WITH MANAGEMENT:

The personnel contacted were cooperative throughout the inspection visit. The office personnel were extremely busy answering telephones, etc. as this is in the peak of their sales season making it difficult to conduct the inspection; despite this Victor personnel did search files to locate the documentation necessary for this inspection. At the close of the visit Ms. Ciccone asked "if any fines would be issued." It was explained to her that unlike some other federal regulatory agencies the CPSC did not issue on the spot penalties; instead the information collected during the visit would be reviewed by CPSC Compliance personnel and a formal notice to make corrections would be issued to the firm in writing. Ms. Ciccone was told that any decisions regarding civil penalties would be made by CPSC Compliance personnel at a later time. As the personnel contacted did not know that the firm had been previously inspected by the CPSC, no mention was made of the previous labeling violations noted on many of these products.
