SUPPLEMENTARY INFORMATION:

The Commission has been concerned with potential risks posed to children under 3 years of age by the plasticizer diisononyl phthalate (DINP), which is used to soften some children's teething rings, rattles, and toys made from polyvinyl chloride (PVC). DINP can leach from such products when they are mouthed, causing some DINP to be absorbed through mucous membranes. DINP has been shown to cause liver and other organ toxicity in laboratory animals. Also, the Commission has received a petition (No. HP 99-1) from the National Environmental Trust and eleven other organizations asking that the Commission ban PVC in certain children's products.

The Commission appointed a seven-member CHAP to evaluate the existing scientific information regarding chronic hazards posed by DINP and the implications of these hazards on risk to children. The CHAP members were selected from scientists recommended by the National Academy of Sciences. See 15 U.S.C. §§ 2077 and 2080(b). The first meeting of the CHAP was on May 10-11, 2000. The second meeting of the CHAP was on June 20-22, 2000.

The third CHAP meeting will be from 8:30 am to 5:00 pm on September 12 and from 8:30 am to 4:00 pm on September 13, 2000. The purpose of the meeting is for the CHAP to discuss draft sections of the report they will submit to the Commission.

The meeting is open to the public. However, the CHAP will not entertain public comment during this meeting. The period for written public comment to the CHAP closed on June 13, 2000. Oral comment was also entertained by the CHAP on June 20, 2000 during its second meeting. See, *Federal Register* notice of second CHAP meeting 65 FR 34446 (May 30, 2000).
