Commercial Pack Station and Pack Stock Outfitter/Guide Permit Issuance—Errata #5

1. **2006 FEIS, Appendix D, p. D-16, Table D-3:** Table D-3 in the FEIS specified a party size limit of 6 persons / 6 stock for Steelhead Lake in the French Analysis Unit (AU) of the Bishop/Humphreys Geographic Unit. However, party size limits do not apply to this destination because commercial packstock use to Steelhead Lake in the French AU is not authorized (2005 Trail and Commercial Pack Stock Management in the Ansel Adams/John Muir Wildernesses ROD, p. 103, and FEIS, p. II-102). Errata #4, item 3b, erroneously stated that the party size limit in table D-3 applied to the Steelhead Lake that is located in the McGee AU rather than the Steelhead Lake that is in the French AU. This error has been corrected in the table below by removing all reference to party size limits at Steelhead Lake.

Table D-3. Site-specific party size limitations
