For Immediate Release on July 7, 2008

Stop Date is: August 1, 2008

Weekday Closure of Whites Creek Trail Lifted

Carson City, Nevada...The weekday closure of the Whites Creek Trail has been lifted. The public is welcome to hike the trail, but may have to occasionally share the trail with vehicles. The tree falling has been completed, however the contractor will continue to use the road to remove the wood. While the trail is open we are asking hikers to stay on the main trail and out of the work areas on the side of the trail until the contractor completed removing all the down trees. The District Ranger would like to extend a sincere thank you to everyone who cooperated and helped make the project a success.
