TD	FNAL	02/28/2008	02/28/2008	No		0	0	0	0	16865
<p>Medical Comments: About 11:30 a.m. while climbing stairs, employee's boot sole caught edge of stair causing him to fall and strike shoulder on railing.</p> <p>ESH Comments: Employee was walking up the steps to the washroom trailer (T180) and caught the toe of his boot on the landing. He lost his balance and fell forward, falling into the vertical support bar for the platform hand railing with his shoulder. The winter coat employee was wearing probably prevented more serious injury. The employee was not holding onto the handrail as he ascended the steps. The steps did not have any ice on them. NOTICE CONCERNING TORNADO DRILL:

The week of March 3-9, 2008 is Illinois Tornado Awareness Week, and the Wilson Hall tornado drill will coincide with the monthly Site Wide Emergency Warning System test on **Tuesday, March 4, 2008 at 10:00 a.m.** To be compliant with FESHM 2040, which requires that two drills per year be conducted for any facility classified as occupied, we ask that occupants of Wilson Hall participate in a tornado table top drill or exercise to be coordinated by D/S/C personnel. It is important that completed drill critique forms are forwarded to me (jwkent@fnal.gov, or MS 232) within 3 days for final submittal to ES&H.

TO THOSE IN SCHEDULING MEETING DURING TORNADO DRILL:

If the Scheduling Meeting has not yet adjourned by 10:00 a.m., the members will stay in place but discuss the actions that would be taken in the event of a real tornado warning.
