

## Join Us

EPA is seeking individuals with the right skills, values and motivation to help accomplish the EPA mission: to protect human health and the environment.

In the Office of Enforcement and Compliance Assurance (OECA), we work toward this mission by identifying, preventing and reducing noncompliance with environmental statutes. This broad charge requires a multi-disciplinary workforce of professionals with a wide range of expertise including – but not limited to – the sciences, engineering, information technology, law, journalism, business management and public administration.

Nationwide, over 3,000 staff are engaged in the work of compliance monitoring and assessment, case development and litigation, environmental education and training, policy development and analysis, compliance assistance, and communications. Our staff work with others from across the country, including other federal agencies, the states, local and tribal governments, industry, small business, academia and non-governmental organizations.

EPA in 2003 was ranked in the top 5 best places to work in the Federal government by the Partnership for Public Service.\* Excellent benefits, flexible work hours, telecommuting, training, and sensitivity to employees with family responsibilities are just a few of the reasons EPA staff enjoy working here.

OECA offers many opportunities for you to make an important contribution to society and the world we live in. We're looking for people with problem-solving and communication skills, creativity, integrity, and commitment to learning. If you are motivated by a strong desire to work for the environment, and have the relevant educational background or experience, we need you!

We have entry-level and mid-career positions for persons with experience or education in:

Attorney Advisor	Environmental Scientist
Biologist	Geologist
Chemical Engineer	Information Management Specialist
Chemist	Information Technology Specialist
Computer Programmer	Program Analyst
Environmental Engineer	Special Agent
Environmental Protection Specialist	Toxicologist
