

DAUGHTERS AND SONS TO WORK DAY 2008

REGISTRATION INFORMATION PACKET

Daughters and Sons to Work Day (DSTW) Thursday, April 24, 2008. For the 14th consecutive year, Berkeley Lab will host guests of employees — girls and boys ages 9 to 16 — for a day of science and fun. DSTW generates a lot of enthusiasm among employees each year. As space is limited to 140 children, we advise early registration. Note: Workshops are offered in packages. Please have your guest refer to the workshop schedule and descriptions inside this brochure and select the first, second, and third choices for workshop packages she or he would like to attend. Indicate selections on the registration form.

A fee of \$20 per child will be charged to cover expenses for this event.

How to Register: Enclosed is the DSTW registration information for you to review with your guest. Please fill out the registration form for 1 to 3 children. Send in the registration form with a check for \$20 per child, payable to UC Regents (address follows). Keep the remaining information for your reference. Assignments will be made on a first-come, first-served, basis. If your first choice is not available, you will be placed in your second or third choice workshop.

OPENING ASSEMBLY

9:15 – 10:30 Building, 50 Auditorium

MAIL REGISTRATION TO: MS 7R0222

- No registration forms will be accepted after April 18th

VIRTUAL VISIT TO MARS

What are the scientists using to look at Mars from ground level? The Mars cameras are of the highest digital quality and afford a view of Mars that has never been seen before. You will get to use a set of special glasses to view Mars images in 3D and understand the grandeur of another world in our solar system.

LIQUID NITROGEN

Have you ever made ice cream using liquid air? Have you ever frozen a rubber band so that it shatters when you drop it? Have you ever made a cloud? You will do all of this when you experience the properties of Liquid Nitrogen (LN). Learn about Liquid Nitrogen, its properties, and what it means to be $-195.8\text{ }^{\circ}\text{C}$ ($-320.4\text{ }^{\circ}\text{F}$) below zero!

DNA SPOOLING "THE BUILDING STRUCTURES OF LIFE"

Explore the mysteries of DNA and genomes in this workshop from the Genome Science Lab. Learn about DNA structure by building a class model, then experience first-hand how to extract DNA from fruit.
