

DOE/SNS Success Talking Points

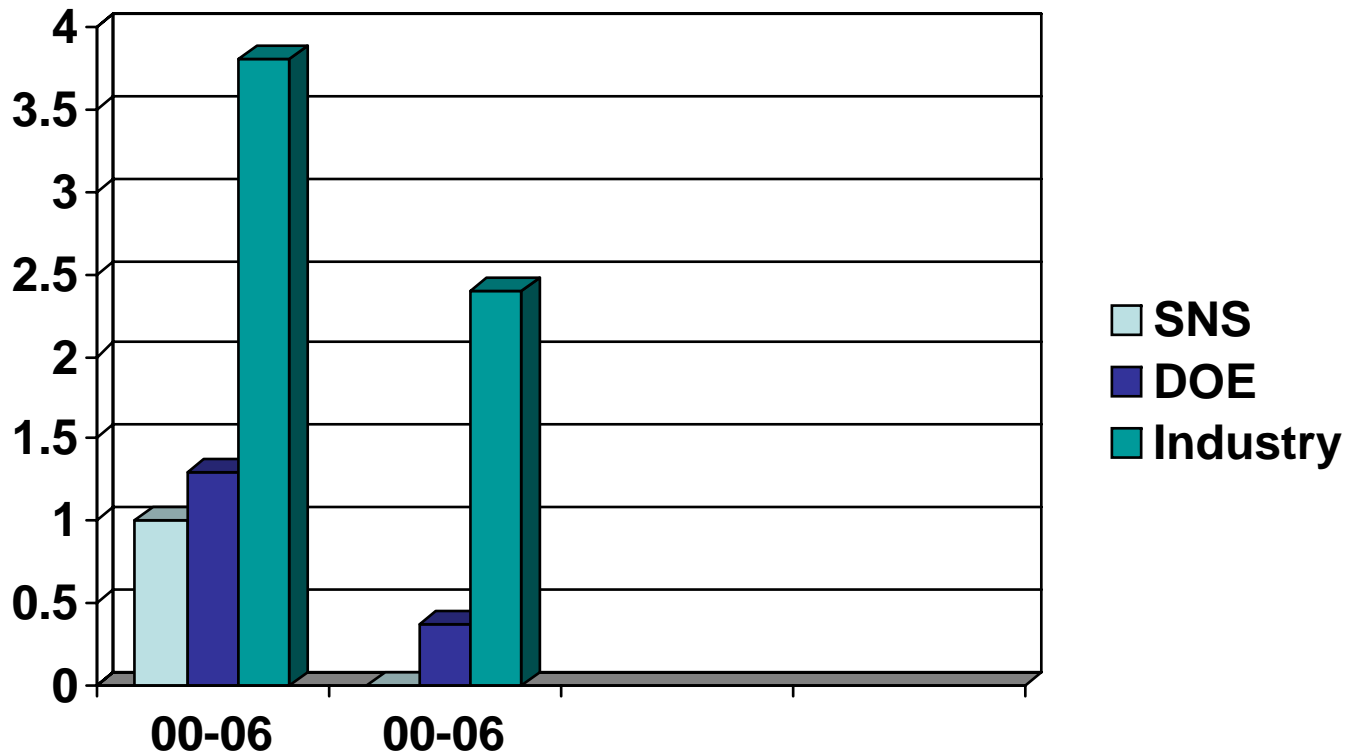

Doug Paul
DOE/ORNL Safety Engr

Hiring a Construction Manager (CM) for Large Construction Project Benefits the M&O 's Ability to Control Injury Rates

- Not Stretching an Existing Organization
- M&O Holds CM Responsible for Safety Performance
- Proven CM Has More Experience on How to Control Rates

What Exactly Did SNS Achieve as Compared with Other DOE or BLS Statistics for Construction Safety?

• Dart Days Away

INJURY RATE STATISTICS

DART Case Rate:

- DOE Average (2000- 2006): 1.3 (27 cases)
- Bureau of Labor Statistics (00-06) : 3.8 (80 cases)
- SNS (00-06): 1.0 (22 cases)

DAYS AWAY RATE:

- DOE Average (2000- 2006): 0.38 (8 cases)
- Bureau of Labor Statistics (00-06) : 2.8 (59 cases)
- SNS (00-06): 0 (0 cases)

(Based on 4.2 Million Hours Worked)

Proactive Case Management is Vital

- Hire Occupational MDs that Understand Work Environment
- 3 Company Doctors; 1 Full time Nurse -Onsite
- Managed Medical Treatment
- Active Communication with Case Manager on Available Work that Meets Restrictions

Involvement of Craft and Local Business Agents

- Recognition/Incentive Programs (Safe Work Crew of the Month, Give Aways, etc.)
- Willingness to do Administrative Duties on Restrictions

Personal Attention by DOE Line
Management and Senior Contactor Management
Must be More Than Visual

- Active Participation by Leading
- Actively Engaged in Safety Topics and Discussions
- Personal Involvement in Incident Investigations
