

HOGS and PIGS

On December 1, 2003, the inventory of all hogs and pigs on farms in New England totaled 28,200 head, eight percent lower than the previous year. When compared to a year earlier, inventories decreased in Vermont by 200; decreased in New Hampshire and Rhode Island by 300 head each; decreased in Maine by 500 head; decreased in Massachusetts by 2,000 head; and remained unchanged in Connecticut. The number of breeding hogs decreased by 400 throughout the region from the previous year, and market

hog inventories decreased eight percent from 2002 levels. The December 1 inventory value of \$2.1 million was down 13 percent from 2002. The total pig crop in New England decreased four percent from 2002, with 49,800 pigs born in 2003. Marketings totaled 57,300 head during 2003, up three percent from the previous year. A \$1.50 increase in the average price per 100 pounds from 2002 to 2003, coupled with increased marketings, resulted in an eight percent increase in gross income to \$4.8 million in 2003.
