

## MILK PRODUCTION

When combining all six states, New England ranked 14th in the nation for milk production in 2007. Milk output in the six-state region totaled 4.05 billion pounds, a decrease of two percent from the 2006 total of 4.12 billion pounds. The annual number of milk cows on New England dairies during 2007 averaged 222,100 head, a loss of 2,000 head from the 2006 average. Annual milk production per cow averaged 18,217 pounds, compared with 18,398 pounds per

cow a year earlier. Milk from the region's dairy farms accounted for 2.2 percent of the total milk produced in the United States during 2007. Cash receipts from milk sales continued as the top contributor to farm marketings in New England for 2007, with \$838 million in sales, an increase of 46 percent from 2006 and the highest total on record. Dairy producers received an average of \$20.87 per cwt for milk produced in 2007, \$6.88 per cwt more than 2006.
