

## LAYERS and EGGS

Laying flocks in New England (excluding Rhode Island) produced 2.0 billion eggs in 2007, two percent below the previous year. Maine led the New England states with 1.0 billion eggs produced in 2007, followed by Connecticut with 814 million eggs. The average price

received for one dozen eggs in 2007 was 87.5 cents compared with 55.8 cents a year earlier. Improved egg prices in 2007 more than offset the decline in eggs produced. New England egg production was valued at \$144.3 million in 2007, an increase of 54 percent from 2006 and the highest value realized in the five-state region since 1997.
