^{1/} Value of agricultural production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

^{2/} A positive value of inventory change represents current-year production not sold by December 1. A negative value is an offset to production from prior years included in current-year sales.

^{1/} Retail costs are based on CIP-U of retail prices for domestically produced farm foods, published monthly by the Bureau of Labor Statistics (BLS). Farm value is the payment for the quantity of farm equivalent to the retail unit, less allowance for by-product. Farm values are based on prices at first point of sale, and may include marketing charges such as grading and packing for some commodities. The farm-retail spread, the difference between the retail value and farm value, represents charges for assembling, processing, transporting, and distributing

^{2/} Weighted-average value of retail cuts from pork and choice yield grade 3 beef. Prices from BLS

^{3/} Value of wholesale (boxed beef) and wholesale cuts (pork) equivalent to 1 pound of retail cuts adjusted for transportation costs and by-product values

^{4/} Market value to producer for live animal equivalent to 1 lb. of retail cuts, minus value of by-products

^{5/} Charges for retailing and other marketing services such as wholesaling and in-city transportation

^{6/} Charges for livestock marketing, processing, and transportation Information contacts: Veronica Jones (202) 694-5387, William F. Hahn (202) 694-5175

2004 FARM PRODUCTION EXPENDITURES

United States farm production expenditures totaled \$210.7 billion in 2004, up 5.1 percent from the revised 2003 total of \$200.5 billion. The largest categories of expenditures that increased were tractors and self-propelled farm machinery up 24.3 percent, fuels up 19.4 percent; fertilizer up 14.0 percent, feed up 9.1 percent and labor up 5.5 percent. Farm services and interest were the only expenditure categories to show a decrease being down 2.2 and 4.3 percent, respectively. The rent expenditure was unchanged from the previous year. The largest two expenditure categories were feed, which accounted for 14.2 percent of the U.S. total production expenses and farm services which accounted for 12.5 percent of the United States total production expenses. The farm service category includes expense items such as custom work, utilities, marketing charges, veterinary services, transportation cost, and miscellaneous business expenses.

The average expenditures per United States farm in 2004 were \$99,983, compared to \$94,542 as revised for 2003. On the average, United States' farm operations in 2004 spent \$14,236 on feed; \$12,480 on farm services; \$10,914 on labor; \$9,016

on livestock and poultry purchases; and \$7,782 on rent. Revised estimates for 2003 indicated United States' farms spent an average of \$12,967 on feed; \$12,684 on farm services; \$10,279 on labor; \$8,723 on livestock and poultry purchases; and \$7,733 on rent.

The Atlantic Farm Production again (New England, New York, New Jersey, Pennsylvania, Maryland, and Delaware, Kentucky, North Carolina, Tennessee, Virginia, and West Virginia) contributed \$32.1 billion or 15.2 percent of the 2004 United States' total for farm production expenditures. Other regions that contributed to the total 2004 United States farm production expenditures were the Midwest (Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin) at \$59.9 billion, followed by the West (Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming) at \$47.7 billion, Plains (Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas) at \$47.5 billion, and the South (Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, and South Carolina) at \$23.6 billion.

- Atlantic: CT, DE, KY, ME, MD, MA, NH, NC, NJ, NY, PA, RI, TN, VA, VT, WV
- Midwest: IL, IN, IA, MI, MN, MO, OH, WI
- West: AZ, CA, CO, ID, MT, NV, NM, OR, UT, WA, WY
- Plains: KS, NE, ND, OK, SD, TX
- South: AL, AR, FL, GA, LA, MS, SC

^{1/} Consists of Connecticut, Delaware, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, Tennessee, Virginia, Vermont and West Virginia.

^{2/} Excludes Alaska and Hawaii.

^{3/} Number of farms reporting item divided by total number of farms.

^{4/} Total expenditures divided by total number of farms.

^{5/} Total includes miscellaneous production expenses not allocated to any of the 16 expense categories published. Therefore, the sum of individual expenditure items will not add to totals.

^{6/} Includes landlord and contractor share of farm production expenses.

^{7/} Includes purchases and leasing of livestock and poultry.

^{8/} Includes all crop custom work, veterinary services, custom feeding, transportation costs, marketing charges, insurance, leasing of machinery and equipment, miscellaneous business expenses and utilities.

^{9/} Includes public and private grazing fees.

^{10/} Includes material and application costs.

^{11/} Includes bedding and litter, marketing containers, power farm shop equipment, miscellaneous non-capital equipment and supplies, repairs and maintenance of livestock and poultry equipment and capital equipment for livestock and poultry.

^{12/} Includes all expenditures related to new construction or repairs of building, fences, operator dwelling (if dwelling is owned by operation), and any improvements to physical structures or land.

^{13/} Changed to include operator dwelling expenses (if dwelling is owned by operation) in 2003.

^{14/} Excludes bedding plants, nursery stock, and seed purchased for resale. Includes seed treatment.

FARM LABOR

The quarterly Agricultural Labor Survey provides regional and national estimates of farm workers, hours worked, and wage rates by type of worker. These figures are used to compute national wage indexes and establish labor laws and regulations. All States, except Alaska, are included in the quarterly survey. Agricultural work is any activity performed on a farm in connection with the production of agricultural products. The survey reference week is always the Sunday through Saturday period that includes the 12th day of the month. Annual rates are averages of the published wage rates for each survey week weighted by the total number of hours worked during the week. The survey results are published for 15 regions, California, Florida and Hawaii. New England is included as part of Northeast I region, which includes Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont.

Farm employment and wage statistics are used by Federal, State, and local government agencies, educational institutions, farm organizations, and employers of agricultural labor. Having reliable information on the number of agricultural laborers working in perishable commodities aids in determining the number of replenishment workers that can be admitted into the United States to offset any domestic shortage, which is required by the Immigration and Reform Control Act of 1986. The data collected from the Agricultural Labor Survey is also used to establish minimum wage rates for domestic and foreign agricultural workers. The Department of Commerce uses data on hired agricultural workers to compute income components of the Gross Domestic Product (GDP) for the farm sector, and banks and lending institutions use the data to establish loan policies.

^{1/} Farm Labor excludes agricultural service workers.^{2/} Hired workers include field, livestock, supervisory, and other workers.^{3/} Annual wage rates are averages of the published wage rates for each survey week, weighted by the number of hours worked during the week. The annual average for all States, Regions, and the U.S. is based on data collection for January, April, July, and October.^{4/} New England includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.^{5/} Northeast I region includes Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont.^{6/} Insufficient data.

CASH RECEIPTS

New England cash receipts from farm marketings totaled \$2.3 billion in 2004, eight percent above 2003, and the highest on record for the region. Cash receipts from milk sales continue to be the top contributor to overall marketings, with \$718 million in sales in 2004. Greenhouse and nursery sales were the next largest cash contributor. Cash receipts from these two commodities comprised 55 percent of all farm marketings in the six-state region in 2004.

New England livestock sales, at \$1.2 billion in 2004, were up 14 percent from 2003, driven by the 25 percent increase in milk sales. Although fewer pounds of milk were marketed, average milk prices received by New England dairy farmers increased from \$13.32/cwt in 2003 to \$17.20/cwt in 2004. Cattle and calf cash receipts were three percent higher in 2004 than a year earlier, with strong prices offsetting a three percent drop in marketings. Most poultry sales were off from a year ago in New England. A slight increase in egg prices failed to offset fewer eggs sold, and translated to a \$7.7 million decline in cash receipts in the region in 2004.

Crop sales in **New England** were estimated at \$1.1 billion in 2004, three percent above sales generated the previous year. The greenhouse and nursery industry remains New England's top contributor to crop sales, with 2004 cash returns at \$550 million, four percent above the previous year. Cranberry sales were well above a year earlier due to a 29 percent increase in production, while fall potato sales declined by 12 percent in 2004.

Cash receipts generated from milk secured **Vermont's** place as first in the region in 2004. The value of milk marketings totaled \$434 million in 2004, a 27 percent increase over a year earlier due to improved prices. Dairy producers in Vermont received on average \$16.90/cwt for milk sold in 2004, compared with \$13.00/cwt for milk sales a year earlier. Vermont milk sales remain the top individual contributor to the state total and New England total cash receipts. Sales from milk comprised 75 percent of Vermont's total cash receipts, and 19 percent of New England's total cash receipts. Farm marketings from crops and livestock totaled \$582 million in the state in 2004, 20 percent above the

previous year.

Cash receipts generated from fall potatoes and a 24 percent increase in milk sales secured **Maine's** place as second in the region in 2004. Total cash receipts generated from all agricultural commodities produced in the state totaled \$554 million, fractionally above the previous year. Milk replaced fall potatoes as the top individual contributor to the state's cash receipt total, with \$109 million in sales in 2004. Potato sales followed, with \$92 million generated. Chicken eggs generated \$61 million in sales in 2004; improved prices failed to offset a 15 percent drop in eggs produced.

Connecticut ranked third in the region in 2004 with \$527 million generated in the state, eight percent above a year earlier. Connecticut's greenhouse and nursery industry contributed \$233 million in cash receipts for 2004, 44 percent of the state's total, and the second largest individual contributor to total New England cash receipts. Milk sales were the next largest contributor to Connecticut's cash receipts, with \$67 million in total revenue generated, 20 percent above the previous year.

Massachusetts followed with \$417 million in total 2004 cash receipts, six percent above the previous year. Greenhouse and nursery sales remained the top contributor to Massachusetts' total cash receipts in 2004, with sales at \$149 million. The next largest contributor to the state's receipts total was cranberry sales. Increased output in 2004 placed cranberry value at \$62 million, which topped 2003 value by 30 percent. Receipts from milk marketed in 2004 totaled \$51 million, 15 percent above 2003 due to improved prices.

New Hampshire's cash receipts totaled \$169 million in 2004, with greenhouse and nursery sales and milk comprising over two-thirds of all receipts.

Rhode Island's greenhouse and nursery industry was responsible for close to two-thirds of the state's \$64 million in cash receipts in 2004.
