

SWEET CORN (for Fresh Market)

Sweet corn production in New England totaled 2.7 million crates in 2005, nine percent below 2004 production. Growers in the six-state region harvested 15,500 acres, 500 fewer acres than were harvested the previous year. Sweet corn condition was rated good to fair for most of the growing season despite the cold, wet spring and the hot, dry summer conditions. Yields

averaged 176 crates per acre, below the previous year's yield of 188 crates per acre. The value of sweet corn production for New England was placed at \$39.1 million in 2005, a decrease of six percent from the previous year. New England growers received an average of \$14.28 per crate of sweet corn in 2005, up three percent from the 2004 price.
