^{1/} Includes operations with milk cows

^{2/} An operation is an place having one or more head of milk cows, excluding cows used to nurse calves, on hand at any time during the year.

^{3/} Information provided by individual State Departments of Agriculture (or its equivalent). The number of commercial operations consists of licensed bovine dairies in each State. 1995 – 2002: Reference date is end of calendar year except Massachusetts which is mid-year (June 30th). 2002: Definition changed to represent the annual average number of dairy farms licensed to sell milk in each State.

^{1/} Adjustments made for changes in inventory and for inshipments.^{2/} Excludes custom slaughter for use on farms where produced and interfarm sales are within the same state.^{3/} Receipts from marketings and sale of farm slaughter^{4/} New England price per 100 pounds is not available.

MILK PRODUCTION

When combining all six states, New England ranked thirteenth in the nation for milk production in 2005. Milk production in New England totaled 4.2 billion pounds, an increase of one percent from the previous year. The region's dairy farmers accounted for

2.4 percent of the milk produced in the United States during 2005, a decrease of four percent from the previous year. The annual average number of milk cows was 230,000, down one percent from the 2004 average. Annual production per cow averaged 18,394 pounds. The United States annual production per cow averaged 19,576 pounds during 2005.

^{1/} Milk sold to plants and dealers as whole milk and equivalent amounts of milk for cream. Includes milk produced by dealers' own herds and small amounts sold directly to consumers. Also includes milk produced by institutional herds.

^{2/} Percentage of milk sold that is eligible for fluid use. Includes fluid-grade milk used in manufacturing dairy products.

^{3/} Cash receipts divided by milk or milkfat in combined marketings.

^{1/} Products manufactured in Massachusetts and New England do not necessarily reflect utilization of milk produced in Massachusetts and New England because of interstate shipments of milk. No adjustments have been made for differences in butterfat content across different states.

^{2/} Selected Massachusetts Frozen Desserts are not published to avoid disclosing individual operations.

^{3/} New England includes all six states.

^{4/} Whole milk conversion factors are approximately: 16.04 pounds of whole milk for 1 gallon of regular hard ice cream; cream; 3.66 pounds of whole milk for 1 gallon of hard sherbet.

TURKEYS

Producers from four New England states, Connecticut, Massachusetts, New Hampshire, and Vermont, raised 131,000 turkeys in 2004, down three percent from the 2003 count. Farmers in Massachusetts raised 53 percent of that total, while Vermont contributed 40 percent. The value of turkey production in New England totaled \$4.9 million in 2004. Pounds produced in the region were down four percent compared to a year earlier. The 2004 New England average price per pound live weight for turkeys averaged

\$1.55, up five cents from the previous year. Over half of the region's cash receipts from turkeys sold were generated from sales of turkeys in Massachusetts.

Growers in Massachusetts and Vermont raised 113,000 turkeys in 2005, a decrease of seven percent from a year earlier in those two states. The value of turkey production for Massachusetts and Vermont decreased 12 percent to \$4.0 million in 2005.

^{1/} Number raised is based on turkeys placed September 1 previous year through August 31 of current year and excludes young turkeys lost.

^{2/} Pounds produced are on a live weight basis.

^{3/} Actual live weight prices

^{4/} Estimates for CT, NH and New England total discontinued in 2005.

^{5/} For 1996 – 2004 New England includes Connecticut, Massachusetts, New Hampshire, and Vermont.

SHEEP and LAMBS

The sheep and lambs inventory as of January 1, 2006, on New England farms totaled 47,000 head, an increase of 1,500 head from previous year. Breeding stock totaled 40,500 head at the first of the year, a four percent increase from the 2005 inventory number count. Nationally, sheep numbers increased two percent from the previous year. This is the first time that the US had two consecutive year to year increases since 1987 and 1988. Prices received in 2004 for sheep and lambs increased five and 10 cents per cwt,

respectively from 2003 prices. Sheep and lambs 2005 total value of inventory was placed at \$9.1 million, an increase of eight percent from 2004. New England's wool production improved to 293,000 pounds for 2005, an increase of three percent from 2004. Producers received an average of 45 cents per pound for wool, unchanged from 2004 sales. New England sheep operations, with one or more sheep on hand at any time during the year was placed at 1,900 in 2005, decreased 100 head from previous year.

HOGS and PIGS

On December 1, 2005, the inventory of all hogs and pigs on farms in New England totaled 28,800 head, unchanged from the previous year. When compared to a year earlier, inventories increased in Massachusetts and Vermont by 1,000 head and 300 head respectively. Meanwhile, hog inventories decreased by 700 head in Connecticut, by 400 head in New Hampshire, and by 200 head in Rhode Island from the previous year. Maine's hog inventory was unchanged when compared

to a year earlier. The number of breeding hogs fell by 200 head throughout the region from the previous year, while market hog inventories increased by 200 head from 2004 levels. The total pig crop in New England increased 15 percent from 2004, with 51,400 pigs born in 2005. The Market Year Average price received by New England farmers for all hogs in 2005 was \$45.00 per hundredweight, a decrease of \$0.50 from 2004. This decrease brought the value of New England's hog inventory to \$3.0 million, down 11 percent from 20⁰⁴.

^{1/} Adjustments made for changes in inventory and for inshipments.^{2/} Excludes custom slaughter for use on farms where produced and inter-farm sales within the State.^{3/} Receipts from marketings and sale of farm slaughter. Includes allowance for higher average price of State inshipments and outshipments of feeder pigs.

Chickens

As of December 1, 2005, New England (excluding Rhode Island) had a total inventory of 10.0 million chickens, an increase of two percent from the previous year's inventory. The majority of inventory consisted of egg-laying hens (layers), accounting for 7.7 million birds, or 77 percent. Maine was the largest

contributor to New England's chicken inventory, accounting for 55 percent of the total birds and 52 percent of all layers. The total value of inventory of all chickens within the five states was placed at \$25.6 million in 2005, virtually unchanged from 2004. These totals do not include chickens of meat-type strains (broilers) raised for commercial meat production

^{1/} Annual statistics exclude commercial broilers and cover the 12-month period December 1, previous year through November 30, current year.^{2/} Includes deaths and other losses during the 12-month period^{3/} New England includes Connecticut, Maine, Massachusetts, New Hampshire, and Vermont. Rhode Island is not included to avoid disclosure of individual operations.

LAYERS and EGGS

Laying flocks in New England (excluding Rhode Island) produced 2.0 billion eggs in 2005, down five percent from the previous year's egg production. Maine led the New England states with 1,025 million eggs produced in 2005, followed by Connecticut with 846 million eggs.

The average price per dozen eggs in the region fell from 72.1 cents in 2004 to 52.3 in 2005. Lower prices in conjunction with decreased egg production brought the value of New England egg production to \$88.5 million in 2005. This total value, down 31 percent from 2004, represents a 61-year low for the region.

^{1/} Annual statistics cover the period December 1 previous year through November 30 current year.

^{2/} Includes all layers and eggs produced in both table egg and hatching egg flocks regardless of size.

^{3/} Eggs per Layer equals total egg production divided by average number of layers.

^{4/} Handling, shipping, and marketing charges excluded.

^{5/} New England includes Connecticut, Maine, Massachusetts, New Hampshire and Vermont. Rhode Island was not included to avoid disclosing data for individual operations.
