

CATTLE and CALVES

New England's cattle and calf herd totaled 487,900 head on January 1, 2007, a decrease of four percent from the previous year. The beef cow inventory was 40,000 head, down one percent from a year earlier. The first of the year milk cow inventory totaled 222,100 head, a reduction of three percent. Cattle and calf inventory value in the six-state region was placed at \$623.3 million on January 1, 2007. Fewer cattle and calves on hand coupled with a drop in value per head resulted in a reduction in value of \$43.6 million from year earlier.

Calves born in New England during 2006 totaled 218,400 head, down four percent from the 2005 calf crop.

Operations with one or more head of cattle at any time during 2006 totaled 7,260 farms, 210 fewer farms than the previous year. Commercial dairy farms in New England during 2006 totaled 2,025 farms, a loss 105 farms from 2005. The New England region has lost 1,890 cattle farms since 1997, of which 1,098 were commercial dairy farms.

^{1/} An operation is any place having one or more head of cattle on hand at any time during the year. Includes operations with milk cows.

^{2/} An operation is any place having one or more head of milk cows, excluding cows used to nurse calves, on hand at any time during the year.

^{3/} Information provided by individual State Departments of Agriculture (or its equivalent). The number of commercial operations consists of licensed bovine dairies in each State. 1997 – 2002: Reference date is end of calendar year except Massachusetts which is mid-year (June 30th). In 2002, the definition was changed to represent the annual average number of dairy farms licensed to sell milk in each State.
